

Water Safe & Sweet

Drinking water is in the news these days. In recent months Canadian health authorities have been proposing adding the mineral fluoride to community water supplies as a preventive against tooth decay.

Quite apart from the pros and cons of fluoridation, chemists point out that it was not for intelligent "tampering" the water in most communities would be unfit to drink.

Chlorine in proper quantities gives us water which is not merely pure but also tasteless and odorless. Scientists searching for water purify discovered that chlorine produced a practically "sterile" water—almost free from all kinds of bacteria.

Elephant Heart, Hippo Fat, Lion's Teeth For Sale

Do you need some hippo fat to smear on your enemy's doorstep? Or perhaps the lion's teeth or an elephant heart to make you brave? Or would you like to stick a rhino's tusk in your rival in love? Then just drop a line to Mr. L. Alter, high-powered businessman in the shopping centre of Johannesburg, who purveys by appointment to 4,000 of the most exclusive witch doctors in Africa.

Surrounded on all sides by the city's most modern stores and tall office buildings in Africa, Mr. Alter's Emporium, almost entirely mail-order, which takes the handless tasks out of the witch doctor's daily grind. Not only does Mr. Alter run a factory with thirty employees, where the lion fat and mandrill

are rendered down, but he operates two retail shops where jungle substances can be seen and purchased in town.

This oddest of all mail-order houses is conducted on a hygienic basis with a staff of chemists to ensure against the accidental brewing of noxious mixtures, and an advisory staff consisting of three witch doctors, who purveys by appointment to 4,000 of the most exclusive witch doctors in Africa.

POLISH UP THE IVORIES

In first step, mother shows how to hold brush parallel to teeth.

Guiding child's hand, mother demonstrates proper rotary motion.

With the reopening of school, more emphasis falls on proper tooth care. Most schools inspect children's teeth and parents should be aware of the right technique to teach their offspring.

Mr. Dolson says that soil for fall wheat must be well drained. The soil should be placed in low areas or open drainage furrows plowed after it is sown.

THE CALVERT SPORTS COLUMN

by Elmer Ferguson. Drama can flare like fire-works, and at least one drama of this kind will occur when the National Hockey League's All Stars play the Chicago Black Hawks on Oct. 2.

Jimmy Skinner, newly-appointed coach of the Red Wings, replacing the late Tommy Ivan, who has moved on to Chicago, has this important chore for his first job in major hockey. Skinner's appointment is in line with the established policy of having the coach of record at the time of the game direct his team.

It is four years since he played for Detroit, his first major league team, but it is proverbial in hockey, and possibly other sports, too, that the expatriates are always at their best, especially former leaguers.

Calvert DISTILLERS LIMITED. AMSTERDAM, ONTARIO. Your comments and suggestions for this column will be welcomed by Elmer Ferguson, c/o Calvert House, 431 Yonge St., Toronto.

crisp Marsh lettuce is a favourite choice in the vegetable market. He had another family of seven sons and three beautiful daughters. The story of sufferers does not always run smoothly. A rifle slipped with nervousness is gripped tightly in his hands. His eyes peer up the well-worn show trail. A dry twig cracks sharply in front. Leaves move as if to his shoulder, arms quickly and fires. A body thumps into the dry leaves, scattering the forest floor. A human body—that of his hunting companion. The hunter thought it was a deer!

Letuce once became plagued with a virus disease called the "holier drop" of the heart of the plant, causing it to turn soft and rot. Entomologists could find no control for it until they discovered that aster yellow was carried by leafhoppers. After this the problem of checking the disease became simple. Kill off the leafhoppers with five per cent of seven and one-half per cent of DDT dust applied at the rate of 30 to 40 pounds per acre and you get rid of the virus. Today, clean.

THE SUNDAY SCHOOL LESSON

By Rev. E. Harold Warren, B.A., D.D. God's Answer to Job's Perplexity. Job 38:1-7; 42:1-6, 10a. Memory Selection: He still, and know that I am God. Psalm 48:10.

The speeches of Job's friends in the time of his great suffering are not the most inspiring readings. They are a mixture of truth and error. However beginning with chapter 38 the Lord speaks to an adequate root system and top menal questions. Sialti morial man contend with the Almighty and shall men charge with the unrighteousness in his rule of the world? He impresses and humbles Job by re-asserting his Creator. Look at the grandest things in nature, and by showing his ignorance and insignificance in a comparison with the Creator. Look at the animate nature; the stars, the light, snow, hail, rain, lightning, the lion, wild ass, horse, ostrich, eagle. Behold behemoth, or the hippopotamus, and leviathan, or the crocodile. None dare stir him up; who dares to contend with his maker? An intellectual solution of Job's problems is not given him, but in a brief reply Job humbly submits himself to God's inscrutable wisdom and expresses regret for his unwise words. He now knew God better. He said, "I have heard of thee by the hearing of the ear, but now mine eye seeth thee."

Ontario) should be seven to eight pecks per-acre. Date of sowing should be adjusted to avoid the insect infestation period but permit development of an adequate root system and top menal questions. Sialti morial man contend with the Almighty and shall men charge with the unrighteousness in his rule of the world? He impresses and humbles Job by re-asserting his Creator.
