

## TABLE TALKS

That cookie jar getting empty again? Well, it's a habit it has in most families, in summer or in winter, especially the latter. So here are a few recipes for "filling" all of them highly recommended.

**ORIENTAL CHEWS**  
2 cups brown sugar  
2 eggs (large)  
1 cup flour  
4 teaspoons baking powder  
24 dates, cut fine  
1 cup chopped walnuts  
Put brown sugar in bowl and break eggs into this; mix well. Add flour sifted with baking powder; add dates and nuts and mix well. Spread on well-greased shallow pan. Bake at 350° for 40-45 minutes. Cut into squares while still hot.

**MOLASSES DROP CAKES**  
2 eggs, beaten  
1 cup sugar  
1 cup sorghum or light molasses  
1 cup melted shortening  
1 cup boiling water  
1/2 teaspoon each salt and ginger  
2 teaspoon soda  
4 1/2 cups (about) flour (do not make too stiff)  
Mix all ingredients together in the order given and allow to stand 20 minutes in the refrigerator. Drop by spoonfuls on cookie sheet and bake at 350° F. Frost with orange or vanilla frosting, if desired.

**OLD FASHIONED COOKIES**  
1/2 pound butter  
3 cups sugar  
2 eggs  
2 cups flour  
1 teaspoon baking powder  
1/2 cup milk  
1 teaspoon vanilla  
Combine sugar and margarine and then add eggs and mix thoroughly. Add milk, sift flour and baking powder together and combine with first mixture. Add vanilla. Roll and cut with cookie cutter (I use heart shape). Bake on cookie tins at 325° F. from 7 to 10 minutes.

**BUTTERMILK CAKE**  
2 cups flour  
1/2 cup butter  
2 cups brown sugar  
1 egg  
1 teaspoon soda  
1/2 cup buttermilk  
1 teaspoon vanilla  
Mix flour, shortening, and sugar until it is the consistency of cornmeal. Add beaten eggs. Add soda and salt to buttermilk and mix well. Add 1/2 cup buttermilk mixture; mix well. Add vanilla. Four butter into shallow, greased baking pan and sprinkle with following topping. Bake 30-35 minutes at 350° F.

**TOPPING**  
2 tablespoons sugar  
1/2 teaspoon cinnamon  
1/2 cup chopped nuts  
Combine all ingredients.

## Money All Over

Even the most blasé globe-trotter gasps when he enters the famous "Copper Room" in Bremen; it is part of an inn whose proprietor's taste in interior decorating has taken a unique form. Glimmering on the walls and ceiling of the room are 10,574 genuine German copper figurines. In some cases the coins are arranged to form figures which include Bacchus, the god of wine, and Lucullus, the celebrated Roman gourmet.

Herbert Giehlmann, the innkeeper, explains: "It was my mother's idea. For weeks on end she mused how to attract customers. Then she remembered that in the early 1800's, shortly after the inflation, a German innkeeper plastered his walls with million and billion mark notes, at that time almost worthless, and thought of the coins. Ten thousand German pfennigs equal approximately \$30.

**KEEPS NECK WARM**—Mink tails and matched pearls are combined to make this expensive bit of finery for formal wear which was recently modeled in Rome, Italy.

True happiness  
springs from  
Moderation

—GOETHE  
(1749-1832)

The House of Seagram

Men who think of tomorrow practice moderation today

## Modern Etiquette

**Q. How long is it correct for a hostess to wait for a tardy dinner guest?**  
A. Fifteen or twenty minutes. It is said that nothing short of illness in the family excuses one for being late for a dinner engagement. At any rate, the tardy guest's excuse to his hostess should be a very good one.  
**Q. Is it considered improper to use the knife in cutting the lettuce in a salad?**  
A. There is no ban at all against cutting the salad with a knife. Lettuce can sometimes prove very stubborn when one tries to cut it with a fork.  
**Q. Is the prefix "Mr." ever omitted from a man's card?**  
A. It is omitted from his business card, but never from the card which he uses socially.  
**Q. Whose place is it to propose a toast at the reception to the bride and bridesmaids?**  
A. The best man, whereupon the members of the wedding party and the guests rise to drink the couple's health. Then the bridegroom rises and expresses thanks for himself and his bride.  
**Q. Is it proper to sip your coffee or tea with the spoon?**  
A. Not the entire cup. The spoon may be used for stirring your beverage and stirring the spoon in the sugar and cream. It is not proper to sip your coffee or tea with the spoon.  
**Q. I have sometimes noticed a man holding a cigar or pipe in his mouth while talking to a woman. Isn't this considered very rude?**  
A. In conversation with a woman, a man of good breeding will always remove his cigar, cigarette or pipe from his mouth.  
**Q. Is the double-ring marriage considered proper these days?**  
A. Whether the man wears a wedding ring or not is entirely a matter of personal taste, and not of etiquette. He may or may not wear a ring, and in either case he will be perfectly proper.

**INFRAROST**—The "frost" Florida visitors never see is captured by the camera with use of an infrared filter and film at Miami Beach. While effect is given by wavelengths of light below the visible spectrum, which humans sense as heat waves.

**Plan To Avoid The Common Cold**  
A miracle cure for the common cold is in the offing, a medical research team reports, but in the meantime family doctors continue to use a verbal vaccine that was probably first prescribed by Hippocrates himself:  
"Keep your feet warm and dry, and don't sit around in drafts."  
Chilled, wet feet are one of the most common causes of colds, the medical men say, and can touch off a lot of cold troubles, too. But this doesn't mean you should suffocate your feet in extra-heavy socks and shoes made of impermeable materials. They'll make your feet perspire, leaving them a prey to blisters, skin irritations, and even frostbite when the weather gets cold enough to freeze the unwarmed foot.

**ROYAL BANK ABROAD**  
Mr. Atkinson reported that the bank's foreign branches had made further progress during the year, with most satisfactory results.

**THE PROBLEMS OF THE FUTURE**  
The problems of the future are acute with every increase in the competitive threat of foreign industry to Canada's markets at home and abroad. Pressure is being brought to bear on the government to take more effective steps to protect the Canadian market from the competition of foreign goods.

## Annual Meeting of Shareholders

## The Royal Bank of Canada

1955 to be "Year of Decision" for Canada, Determining Economic Welfare for Years to Come, Declares James Muir

**Prosperous Future Lies in Improving Competitive Position, Not in Hiding Behind Trade Barriers. Scope of Existing Agencies Should be Broadened to Provide Long-Term Export Credits**

The conviction that 1955 will be a "year of decision" in which the solution of immediate problems will have a tremendous impact on the future of the country was expressed by James Muir, Chairman and President at the Annual Meeting of Shareholders of The Royal Bank of Canada. Only a rare combination of statesmanship and good fortune, he declared, could guarantee a proper solution of these problems.

**1955, YEAR OF DECISION**  
"I believe that 1955 is a 'year of decision' in which the solution of immediate problems will have a tremendous impact on the future of the country," said Mr. Muir. "During 1954 we have seen only a defeat in the financial forces in the economy but the reappearance, at least in a shadowy form, of the deflationary bogey of the 1930's. In January, 1954, 'it is comparatively easy to decide on the appropriate direction of monetary and fiscal policy, and the major problem becomes that of choosing the right mix of instruments to achieve a reduction in certain components of the National Accounts as well as in the Gross National Product itself. We have seen as well increased competition in home and foreign markets from the revived industry of the United Kingdom, Western Europe, and the United States."

**ROYAL BANK ABROAD**  
Mr. Atkinson reported that the bank's foreign branches had made further progress during the year, with most satisfactory results.

## Those "Secret" Ballots Not Really Secret?

Lord Melbourne, that most conservative of Wing statesmen, was opposed to the secret ballot because, as he said frankly, the secret ballot enabled "subversive people to express themselves more freely." He wanted everyone to stand up and be counted, and heaven help the man who didn't vote the way the people in power wished him to vote.

Full circle. A good many labor leaders don't want the secret ballot, they say, because they profess it to be the Lord Melbourne of today are labor leaders.

There is convincing evidence that recent strikes have been against the wishes of the majority of the strikers, although there have been hypocritical claims that the votes were accurate reflections of the opinions of the workers.

The democratic world has been fighting for at least 150 years to obtain and keep a truly secret vote. Election machinery, after generations of efforts to perfect it and to prevent fraud, is still not perfect. But it is a fact that, except in rare instances, the will of the people is expressed in municipal, provincial and dominion elections. It is a fact that no man needs to say how he voted and his vote, when cast, can be and usually is honestly counted.

Until union voting has reached that stage, an announcement that a union membership vote has been 77 per cent in favor of continuing a strike (when the whole town and all the neighbors know that the striker wanted to get back to work at his regular job) must be viewed with deepest suspicion.

Who usually counts ballots in a union vote? It is a union official. Are there scrutineers? No. Are there poll clerks who keep track of the names of people who have voted in order to prevent the labor vote in general elections but it seems to be that labor's vote in a union dispute is pro-union leader.

Some people argue that union votes should be government supervised. There is a "government" vote in British Columbia and it cannot be said that, after several years of experience, labor difficulties in

**THE FARM FRONT**  
by John Russell

(This is the conclusion of an article "The Farmer and the Fisherman" begun last week.)

The use of seaweed in agriculture is a very old and widespread practice wherever rich supplies of this plant are readily available. In England, Scotland, Ireland, Norway, the Pacific Northwest, and New Zealand, Australia, India, and Japan, seaweed is either carried from the beaches to the fields or dried to a powder to be used as fertilizer or feed supplement. Its fertilizing value is considerable, and in addition, it acts as a natural soil conditioner. Its nutritive value is caused not so much by a high content of organic matter but by relatively large amounts of vitamins and minerals, especially trace minerals. It is, therefore, not surprising that a really small addition of dried pulverized seaweed to the feed ration greatly improves the growth of the milk yield and fat content. These beneficial results are most probably due to the combined action of small amounts

**CROSSWORD PUZZLE**

## New Cheese Bread Bubbles Over With Tasty Nutrition

Here's a big value in home baking—cheese bubble loaf. The extra milk solids and the cheese that go into it add lots of extra nutrition while making it taste better, too.

**Cheese Bubble Loaf**  
(Makes 4 loaves)  
Three-quarter cup milk, 1/4 cup sugar, 2 1/2 teaspoons salt, 4 1/4 tablespoons shortening, 1 package or cake of yeast, active dry or compressed; 4 1/4 cups sifted, enriched flour; 1 tablespoon melted butter; 1/2 pound Cheddar cheese, grated; 1/2 cup milk; 1/2 cup sugar; 1/2 cup shortening. Cool to lukewarm. Measure water into a large mixing bowl (warm, but not hot, for active dry yeast, lukewarm for compressed yeast). Sprinkle or crumble in yeast; stir until dissolved. Stir in lukewarm mixture.

Add half the flour. Beat until smooth. Stir in remaining flour. Turn out on lightly floured board. Knead until smooth and elastic. Place in a greased bowl; brush top with shortening. Cover. Let rise in a warm place, free from draft, about 1 hour or until doubled in bulk. Punch down and turn out on lightly floured board. Divide dough in half. Form each half into a roll about 12 inches long. Cut each roll into 24 equal pieces. Roll into balls.

In 2 well-greased loaf pans about 8x5x3 inches, place a layer of balls about 1/2-inch apart. Brush lightly with the melted butter. Sprinkle with half the grated cheese. Arrange a second layer of balls on top first. Brush with melted butter and sprinkle with remaining cheese. Cover. Let rise in a warm place, free from draft, about 1 hour or until top of dough is slightly higher than edge of pans. Brush with more butter. Bake in moderate oven (375 degrees F.) for 30 minutes.

Here's a delicious vegetable dish for your winter menu:  
**Fresh Snap Beans and Tomatoes**  
(Yield: 4 servings)  
British Columbia are less than elsewhere in Canada. There continue to be foolish strikes in the whole town and all the neighbors know that the striker wanted to get back to work at his regular job) must be viewed with deepest suspicion.

What is the explanation for a 70-odd per cent vote in favor of continuing the Massey-Harris-Ferguson strike when everyone was sick of it? This was not a case of strengthening the hands of the bargaining committee in advance of bargaining. — From The Printed Word.

able that the menhaden industry regained and even by far surpassed its original economic importance. When the fish reducing plants resumed large scale operations, the water fraction obtained from the steam processing of menhaden, called "stick water," was let into the rivers and it was not until the Second World War, when fish meal manufacturers were forced to do something against this public nuisance, that they discovered the enormous food value of this "waste product." It contains all the water soluble substances ensuing from the reducing process such as mineral salts, vitamins, soluble proteins, amino acids, etc., and is presently our richest source of cod liver oil, vitamin B-12 and other yet unknown growth factors. Consequently, it is no more wasted, but carefully recovered, condensed to 50 per cent solid content and used as "condensed fish solubles" for the enhancement of the nutritive value of fish meal or other feed mixtures.

There is also another aspect of this former "waste product" that should be most seriously considered and challenging to the young farmer. It has always been taken for granted that young mammals are absolutely dependent on mother's milk. This scientific unproven assumption is responsible for an immense and quite unnecessary loss, because millions of farm animals, especially little pigs and lambs, perish every year either because their mothers have not enough milk to nourish their broods or they are killed by crushing or suffocation while suckling. A few years ago agricultural scientists conceived the idea of raising pigs on an artificial "milk" composed of all essential nutrients and fortified with antibiotics. A considerable part of this "milk" consists of fish solubles and this explains its extremely high nutritive value. For piglets raised on this artificial food, the weight gain was 50 pounds after the normal nursing period of 56 days, while those suckled by the sow attained same period only 22 pounds.

In fact, we are standing at the threshold of unimaginable developments in agriculture for the benefit of all mankind, as the cooperation of farmers and fishermen becomes better coordinated. For it will bring back to the soil and ultimately to the dinner table the nutrients that have been carried away by the leaching, eroding, and flowing waters. However, while farmers throughout the centuries have made great progress in food production, it is now up to the fisherman to bring man's oldest industry to a modern level of efficiency, economy, productivity, and conservation of resources.

Here we cannot deny that great things are in the offing. Helicopters spot the schools of fish; radar, sonar, and other electronic devices show their exact location, depth, and even the number and type of fish; modern fishing gear hauls the fish on board and recently it has been shown that electric currents can be used to attract and catch fish since they usually wander or swim to the anode; immersion freezing in the ship's bottom prevents the fish from spoiling, while reducing plants installed on the ships start immediately converting the non-edible part

**Building Taller Than Empire State**  
Soon the Empire State Building may lose its title of the tallest skyscraper in the world, which it has held for twenty-three years.

PARROT GOT THE BIRD!  
A parrot has caused an uproar in the children's section of the Wellington, New Zealand, zoo. It was presented to the zoo by an old sailor and it delighted the children—for a few hours, until the keepers discovered why Percy the Parrot was causing such a lot of laughter. It was his highly-flavoured nautical language!

A corn canner has been built upside-down to prevent peeking at the corn while it is cooking.

## SUNDAY SCHOOL LESSON

Rev. R. B. Warren, B.A., B.D.  
Man's Nature and Need  
Genesis 1:26-31; Romans 8:23; Hebrews 2:9

**Memory Selection:** What is man, that thou art mindful of him, and the son of man, that thou visitest him? For thou hast made him a little lower than the angels, and hast crowned him with glory and honour. Psalms 8:4-5.

The idea that man is just an animal who has evolved a little farther is still held by some people. Students of zoology note the similarity between the physical structure of the bones of a bird's wing and man's arm and see a more general similarity between a rabbit and a man. But while he wonders at the physical similarities of man to the higher mammals he marvels yet more at the mental difference. Even the ardent evolutionist must admit that if man came from the ape, he certainly came a long way. But evolution is only a theory. Until proof is forthcoming it cannot be regarded as scientific fact.

The Genesis story of man's beginning is very simple. After God had created life upon the earth, herbs and fish, birds and animals, he said, "Let us make man in our image, after our likeness." Yes, here is the difference. Man was made in God's image. He not only possesses such intelligence but he has a moral being. Though he has sinned and come short of the glory of God, the divine image has not been completely effaced. He needs a Saviour. God gave his Son in the likeness of sinful flesh in order to save man. He was made a little lower than the angels and tasted death for every man. When man believes in Jesus Christ, God's Son, as his Lord and Saviour, a great change takes place. He is restored to the favor of God. He lives with cleanliness of life becoming to one of the redeemed children of God. "Being made man in our image, after our likeness." Yes, here is the difference. Man was made in God's image. He not only possesses such intelligence but he has a moral being. Though he has sinned and come short of the glory of God, the divine image has not been completely effaced. He needs a Saviour. God gave his Son in the likeness of sinful flesh in order to save man. He was made a little lower than the angels and tasted death for every man. When man believes in Jesus Christ, God's Son, as his Lord and Saviour, a great change takes place. He is restored to the favor of God. He lives with cleanliness of life becoming to one of the redeemed children of God. "Being made man in our image, after our likeness." Yes, here is the difference. Man was made in God's image. He not only possesses such intelligence but he has a moral being. Though he has sinned and come short of the glory of God, the divine image has not been completely effaced. He needs a Saviour. God gave his Son in the likeness of sinful flesh in order to save man. He was made a little lower than the angels and tasted death for every man. When man believes in Jesus Christ, God's Son, as his Lord and Saviour, a great change takes place. He is restored to the favor of God. He lives with cleanliness of life becoming to one of the redeemed children of God. "Being made man in our image, after our likeness." Yes, here is the difference. Man was made in God's image. He not only possesses such intelligence but he has a moral being. Though he has sinned and come short of the glory of God, the divine image has not been completely effaced. He needs a Saviour. God gave his Son in the likeness of sinful flesh in order to save man. He was made a little lower than the angels and tasted death for every man. When man believes in Jesus Christ, God's Son, as his Lord and Saviour, a great change takes place. He is restored to the favor of God. He lives with cleanliness of life becoming to one of the redeemed children of God. "Being made man in our image, after our likeness." Yes, here is the difference. Man was made in God's image. He not only possesses such intelligence but he has a moral being. Though he has sinned and come short of the glory of God, the divine image has not been completely effaced. He needs a Saviour. God gave his Son in the likeness of sinful flesh in order to save man. Man was made in God's image. He not only possesses such intelligence but he has a moral being. Though he has sinned and come short of the glory of God, the divine image has not been completely effaced. He needs a Saviour. God gave his Son in the likeness of sinful flesh in order to save man. He was made a little lower than the angels and tasted death for every man. When man believes in Jesus Christ, God's Son, as his Lord and Saviour, a great change takes place. He is restored to the favor of God. He lives with cleanliness of life becoming to one of the redeemed children of God. "Being made man in our image, after our likeness." Yes, here is the difference. Man was made in God's image. He not only possesses such intelligence but he has a moral being. Though he has sinned and come short of the glory of God, the divine image has not been completely effaced. He needs a Saviour. God gave his Son in the likeness of sinful flesh in order to save man.
