

ANNE HIRST

Your Family Counselor

"My father has put his foot down. He won't let me have red fingernails or wear off-the-shoulder dresses!" cries a 15-year-old rebel. "I want to be the first in my crowd. I've been around and I'm old enough to know what is becoming. Why won't he realize I'm grown up now?"

Every day in this odd corner of the old world between the generations rears its angry head. Youngsters demand the right to do as they please, parents are reviled for urging taste. Occasionally a stranger who has also been around can point the danger that lies ahead to teen-agers who think they know best.

Fair or not, first impressions do depend on appearance and manner. Nice boys in their teens are more critical than many girls realize. Their eyes may glint at a plunging neckline or flashy make-up but they don't want to be seen with the girl who displays them.

GOOD TASTE LEADS

Who of our readers knows a lad who likes his girl's fingernails to look like bloody claws? Too much rouge on her tender cheek brings a blush to his own. A parent that looks like a bushy mop disgusts him, and a heavy perfume turns his head the other way. Taste varies with the individual, but any teen-ager who wants to make an impression on nice young men

See it In A Day!

4553
12-20-30-42
by Anne Adams

Look at the diagram - even a beginner can sew this honey of a dress in a day! Few pattern parts, minimum details of world of style! Curvy neckline, fitted bodice and flared skirt are so smart, so-o-o flattering! Choose cool nylon print, linen, cotton.

Pattern 4553: Misses' Size 12, 14, 16, 18, 20, 30, 32, 34, 36, 38, 40, 42. Size 16 takes 3 1/2 yards 35-inch.

This pattern easy to use simple to sew, is tested for fit. Has complete illustrated instructions.

Send **THIRTY-FIVE CENTS** (35¢) in coin (stamps not accepted) for this pattern. Print plainly **SIZE, NAME, ADDRESS, STYLE NUMBER**. Send order to Box 1, 123 Eighth St., New Toronto, Ont.

or unmake your reputation. Wise is the teen-ager who takes good taste as her model, and never offends against it. If this is one of your family arguments, tell Anne Hirst about it and read her opinion; it has guarded many a nice girl against being misunderstood. Address her at Box 1, 123 Eighth St., New Toronto, Ont.

Hot-Water GINGERBREAD

Grease an 8-inch square cake pan and line bottom with greased paper. Preheat oven to 325° (rather slow). Mix and sift three times 2 c. one-soft pastry flour (or 1 1/2 c. one-soft all-purpose flour), 2 tps. Magic Baking Powder, 1/2 tsp. baking soda, 1/2 tsp. salt, 1 tsp. ground ginger, 1/2 tsp. ground cinnamon and 1/4 tsp. grated nutmeg. Cream 5 tps. sugar and 1/2 c. molasses; add 4 well-beaten eggs part at a time, beating well after each addition; stir in 1/2 tsp. grated lemon rind and 1/2 tsp. vanilla. Add flour mixture to creamed mixture about a third at a time, combining lightly after each addition; pour into 8-inch square pan. Bake in preheated oven about 45 minutes.

Always Dependable

They laugh at blisters - "Grandma Walker" Court and her donkey, "Uranium," consider that a big joke's afoot as they prepare to walk the 150 miles of road between Kenawick and Spokane. Grandma will have travelled twice the distance by the time she finishes the jaunt, as she'll lead Uranium for a few miles, then backtrack to pick up her auto, meet Uranium, and take off on foot once again. All in this preparation for a covered-wagon tour in search of inspiration for her paintings.

Yes, She Has Some Bananas—Eats 10,000 a Year

Because she suffers from a rare stomach complaint, five-year-old Susan Morgan of Ponchaouta, Mo., has eaten almost 20,000 bananas since her third birthday. It is reckoned that she will have eaten about 70,000 by the time she is ten years old, and she will have to go right on eating bananas at 80 right on eating bananas at 100. The banana problem in the Morgan family is so acute that the State Welfare Board has granted Susan's father eight dollars a month to buy bananas for the little girl. Doctors hope the complaint will disappear by the time she turns fifteen.

"TO 'GROWN-UP NOW'—Follow these rules, and you can't go wrong; if you follow your own, you'll be laughed at. At Lord Chesterfield's advice to his son includes: "Take great care of your teeth. They are like the reasonable people of your own age... whose dress is never spoken of in one way or another, as either too negligent or too much studied." Morgan family is so acute that the State Welfare Board has granted Susan's father eight dollars a month to buy bananas for the little girl. Doctors hope the complaint will disappear by the time she turns fifteen.

Loving's Love, built in Detroit by Neal Loving, was flown 2,200 miles to Jamaica in seventeen hours flying time. Do-it-yourself airplane building leads down strange paths. In Sky Harbour, Maine, two builders' need an oddly shaped plastic bubble for the cockpit. They finally formed it by using the town baker's oven.

Build-It-Yourself Aeroplane Craze

A Build-It-Yourself aeroplane movement is zooming across the continent. The Experimental Aircraft Association, with national headquarters at Milwaukee, on Lake Michigan, has 1,200 members. There are thirteen organized groups of eight or more in cities from coast to coast. Ten prospective groups are being formed.

There are individual members in ten other countries. A soldier in Korea requested plans for a plane in his spare time. Paul H. Poberny, a service pilot, organized the group in Michigan.

"I believe that encouraging fellows to put their ideas into a design and build it," he says, "may some day pay off with a practical aircraft with the utility of the automobile."

Not everyone, as maintenance officer with the National Guard in Milwaukee, Poberny presides over monthly meetings of the headquarters group, whose members arrive at the evening from 150 to 200 miles away.

Once a year comes a big "fly-in" at Milwaukee airport.

ISSUE 24 - 1955

And yet in other respects it is so much nicer living farther out in the country, away from the highway. Farm houses surrounded with aging trees; old apple orchards; cows drinking down at the creek; bullfrogs in the swamp; red-winged blackbirds darting in and out among the cattails; and on our farm we never see a red-winged blackbird at all. Weigh the advantages against the disadvantages and what have you? I still don't know. I suppose a lot depends upon what one wants and one's ability to cope with the advantages. I have in mind one farm, the home of an elderly couple. They have cattle, but there is no milking—no cowboys. A never-failing stream provides water for the household and all kinds of other uses. A free range, supply the house with eggs. Occasionally a hen lays away and comes out with a clutch of fluffy chicks. It seems like an ideal set-up—a type of farming, if you can call that, that is just a way of living. But then you come to the house... no hydro, no labour-saving devices, a lovely life need the amenities of modern living. But at night just a coal-oil lamp to lighten the darkness to say nothing of outdoor plumbing.

No, I can't think of it. In this day and age that is pastoral living carried to extremes. It seems to me people past middle life need the amenities of modern living even though they bury themselves in the woods.

However, the foregoing are just imaginary problems. The difficulties we have to deal with today are real... but very!

Last week Partner sold all the milk cows to one buyer. The trucker was to pick them up first thing this morning. It is now mid-morning and he still hasn't arrived. So here we are, two men waiting to help load. However, we just got a phone call to say he would be here right after dinner. So here we are, just on edge, waiting around until the truck comes—while the cows wait patiently down in their stalls, little knowing this is the last day they will spend in surroundings that have been familiar to them since calfhood. It is a very hot day, which doesn't make things easier. However, we understand the truck is air-conditioned, padded and separated into several compartments with two men in charge who know how to deal with cattle. So maybe the cows will be cooler on the road than they would be in the pasture. In the meantime they are cool and comfortable in the stable. At a time like this I can't help thinking of the difference between dealing with animals and inanimate things. If we were selling a car or a piece of equipment it wouldn't matter much when the buyers came for their purchase. But cows are creatures of flesh and blood so we naturally have some concern for their welfare. How many of us could feel otherwise? I don't know.

And after the cattle are gone... no cows for Partner to milk!

Yippee! DOUGHNUT TWISTS

Raised light and tender with new Active Dry Yeast!

There's a new twist in doughnuts—a new thrill in all your baking! Say goodbye to perishable yeast! Fleischmann's Active Dry Yeast keeps full strength until you use it—fasting when you use it. Get a dozen packages in your cupboard!

Where is the ideal location for a farm home? Don't you sometimes wonder? I certainly do. If you could move your farm to a different district where would you go? Here are we, just a nice distance back from a good paved highway. Cars pass our place at fifty (?) miles an hour but yet there is no dust to annoy us. And if we go out, as long as we stay on the highway the travelling is good. However, that isn't always possible. Yesterday, five miles along one of our gravel roads, I drove about five sidetracks where road work has been in progress for several weeks. I was road for several days and I couldn't help wondering how farm people along that road could put up with it. Not only is it a nuisance, it is also a menace. Children walk along the road and from a school bus are seen immediately after a car has passed and drivers have to be particularly cautious climbing the hills and emerging from the dust on the wrong side of the road. After a little trip across country the conclusion that lives on the highway spoils one for travelling on other roads.

Scald 1/2 c. milk, 1/2 c. granulated sugar, 1 1/2 tps. salt and 1/2 c. shortening; cool to lukewarm. Meanwhile, measure into a large bowl 1/2 c. lukewarm water, 1 tps. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 c. yeast. Let stand 10 minutes. THEN stir well.

Add cooled milk mixture and vanilla. Stir in 2 c. one-soft bread flour, beat until smooth. Beat in 2 1/2 c. (about) one-soft flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and let rise until doubled in bulk. Punch down dough and roll out into a rectangle, 1/2" thick; loosen dough roll again to 1/2" thickness. Cut into strips 1/2" long and 1/2" wide. Fold strips in half, twist, then pinch ends together. Arrange well apart, on lightly-floured cookie sheet; grease top. Cook in red unit doubled in bulk. Shortening, a few at a time, in a shallow pan of water, until browned. Drain on browned paper. When under-sides are browned, turn and cook second sides. Carefully lift from fat and drain on browned paper. Coat with a mixture of fruit sugar and cinnamon or brush hot doughnuts with the following syrup: Heat, stirring, 1/2 c. sugar, 1/2 c. water; simmer 5 min., then stir in 1 tsp. vanilla. Keep hot over boiling water—1 cup becomes too sugary, stir in 1/2 c. water. Boil until thick to boiling point. Yield—5 dozen doughnuts.

Note: Dough may be cut with an orthodox doughnut cutter; fry the doughnuts and the "holes".

For Girls and Boys

by Laura Wheeler

Nothing prettier for play in the back yard than a little baby sewing machine. Sewing a cinch—embroidery for girls and boys. To fit 6-month, 1-year, 2-year, 3-year, 4-year, 5-year, 6-year, 7-year, 8-year, 9-year, 10-year, 11-year, 12-year, 13-year, 14-year, 15-year, 16-year, 17-year, 18-year, 19-year, 20-year, 21-year,
