LAKE ERIE GAS FIELD-ONTARIO

The geophysical survey of Midcon's 14,000 acres has been completed with alts of much interest to the Company's Geologists. An exploratory well is now being drilled on an indicated structural "high" as outlined in the gravity meter survey. This well, a structural test to determine the geological tops to tie in with the survey, is a first step in a drilling program under study.

This initial well is expected to confirm the under-water extension of the important Declute Gas Field into the eastern portion of Midcon's holdings. The western portion of the Company's acreage adjoins Consolidated West Petroleum Limited in the Tilbury Gas Field extension where some 30 successful wells have been drilled to date.

The first portable steel drilling tower, completely equipped to include power and lighting equipment and living quarters, makes drilling operations possible in any part of Lake Erie under exploration, regardless of water depth. The tower was moved "on location" for this exploratory well on the 1st of October and drilling commenced on October 11th. ETZIKOM RESERVES-ALBERTA

Midcon's subsidiary — South Alberta Pipelines
Limited — completed the pipe line from the Company's jointly owned gas reserves in the Etzikom
Gas Field to Medicine Hat September 1st, 1956.
The line has been given final test and is now ready to serve Northwest Nitro-Chemical Limited and the City of Medicine Hat, which have 15 and 20-year contracts with South Alberta Pipelines Limited, in which Midcon has a 50% interest.

Northwest Nitro-Chemical Limited is already taking some gas from this line, having started the first chemical plant unit this month. Full production will follow shortly, when delivery is expected to reach a minimum of 2,300,000,000 cu. feet of gas

The City of Medicine Hat should start taking delivery of gas from this pipe line, under its contract, next month, or when the winter heat load starts to build up. The City has purchased 36.000.000.000 cu. feet of the Etzikom Reserves to be delivered over the next fifteen years.

MIDCON OIL & GAS COMPANY LIMITED

Executive Office: 170 Bay Street, Toronto, Ontario

Here! New Task-Force 57 Chevrolet Trucks!

Performance-proved in a history-making test on the ALCAN Highway to Alaska

Here are the trucks that conquered the Alcan Highway — one of the world's most challenging roads! Six new '57 Chevrolet trucks, loaded with cargo, roared north from Dawson Creek, B.C., through 1,520 miles of mountains and mire, rain and hail - every conceivable natural roadblock - to Fairbanks, Alaska. Running around the clock, they made this tortuous trip - normally a 72-hour run - in less than 45 hours.

Like a carelessly unwound ribbon, the Alcan Highway twists and reels for 1,520 miles. It tumbles over towering mountains of awesome beauty and wanders through desolate Yukon forests. A miracle of engineering - but a brutal

their time. The road where gravel endlessly

in a few hundred miles.

It's the road where trucks grow old before

sledgehammers the life out of trucks. Where a fog of superfine dust chokes engines, and vicious ruts subject chassis to months of wear

This is the road that was chosen to give the new '57 Chevrolet trucks a supreme test of

more besides! Never before has a new truck stamina, performance and handling ease. The been so thoroughly proved. Come in and look results of that test made hauling history! over these new Alcan champs!

FIRST WITH THE MOST MODERN FEATURES!

New 283-cubic-inch Taskmaster V8 delivers 160 high-torque horsepower. Standard in Series 1800 and 1700, optional in Series 1300 through 1600 at extra cost. Horsepower ranges up to 220 in Chevrolet's complete line-up of modern V8 and 6 truck engines.

Revolutionary Powermatic Transmission! This six-speed automatic, designed specifically for power divider—plus a unique "self-steering" action that reduces tire wear and increases handling area. New 263-cubic-inch laskmaster to a celever to ingin-reque noisepower. Are separated to ingin-reque noisepower conges up to 220 in Chevrolet's complete line-up of modern V8 and 6 truck engines.

Revolutionary Powermatic Transmission | This six-speed automatic, designed specifically for heavy-duty hauling, is an extra-cost option in series 1600 through W1900 models. Hydra-Matic is offered in 1300, 1400 and 1500 Series models at extra cost.

New 1957 work-styling gives Chevrolet trucks an even fresher, fleeter appearance. There are three different and distinctive treatments. Proved on the Alcan Highway... Champs of every weight class!

JARVIS

Alcan fleet reports up to 20 miles per gallon! That's based on official AAA fuel consumption figures for the Cameo Carrier, powered by the famous Thriftmaster 6 engine and equipped with Overdrive (optional at extra cost).

All the way in DRIVE range with Powermatic! As a special test, this Powermatic-equipped 1900 Series tractor travelled the length of the Alcan Highway — up mountains and through washouts — in a single forward-speed range!

New Super Taskmoster V8 flottens Yukon mountains! This 1957 1800 Series truck with its new 283-cubic-inch V8 engine was washouts — in a single forward-speed range! grades with jackrabbit agility.

elled the length of the Alcan highway in less

than 45 hours. They ran day and night - but

this was no test of speed. It was a measure of

the ability of these new Chevrolet trucks to

perform under typical conditions on the truckkilling Alcan run. The Chevrolet fleet made

normal stops along the way, and maintained

safe and legal speeds. As a special additional

test during the run, two of the trucks went the

entire distance without once having their engines

It's all down in the AAA record book. And
