**WOMAN INJURED BY LIGHTNING FLASH**  
A flash of lightning ripped the left shoe off the foot of Mrs. F. Newell shortly after noon on Sunday as she sat in her home near Kenton, during an electrical storm. The flash rendered Mrs. Newell momentarily unconscious and continued through the house knocking out the electrical circuit and causing some damage. Mrs. Newell, who is eighty-eight years of age, was alone in the house at the time. Her son, Mr. O. Newell, came into the house shortly after to find her partially recovered from the shock. The lightning struck her torn from her foot and she suffered some bruises which may have been caused by falling when the lightning struck.

Although her injuries were miraculously not as serious as first expected, she was removed to the home of her daughter, Mrs. David McVeigh, at Jarvis, where she is now convalescing.

## Knox Church Hold Sunday School Picnic

The Caledonia dam on the Grand River was the scene of another flooding accident on Sunday when 24 of 22 Fenings Street, slipped and fell into the swirling water.

The victim was with two companions and had survived at Caledonia start fishing on Sunday morning. The dam was washed away and the water was recovering.

Caledonia police chief Alex Hendry was called and he turned in the alarm disaster unit.

The unit, with Fire Chief Jack Foster in charge, responded with three boats and dragged the area until eleven o'clock when the dam was recovered.

Constable L. W. Spry, Cayuga O.P. was called to the scene. The officer in charge was Dr. D. Riggs of Dunnville.

**NOTICE**  
Sorry girls, but I will not be hair-dressing until August 20th.

### ON THE FARM FRONT

By Halldimand Harry

Falldimand hog producers marketed through the market 233,500 head during the month of June. This was a record for the month. Improvement in the market was 1.53 per cent. The price per head was \$11.15, down from \$11.30 in May. The percentage of 'A' hogs was 27.59 per cent for the month. The percentage of 'B's' was down in June from 37.5 per cent in May to 37.5 per cent in June.

There are still far too many out-things in the market and the market is especially tight in the case of almost seven times more than in June as was sold in Halldimand County. There really isn't much extra. Plenty of our producers have proven top grade hogs. Halldimand producers have the "know-how" and the confidence.

According to a recent Dominion Bureau of Statistics report, meat and lard of swine were down during the same date a year ago. Pork (46 per cent) and amounted to 131 million pounds and almost double what they were a year ago.

Another D.B.S. report, indicated that the production of swine in Canada was down by 5.8 per cent in the first five months of the year. The total number of swine was down only by 0.1 per cent. This means that the average farm in the province is producing 5.8 per cent more than in 1951 with 27.3 acre. The figure for Ontario is 14.14 acre, up 2.2 acres in the five years.

Prof. George Jones, when addressing a couple of crop meetings in Halldimand last week, stressed the new light on the weed control situation. Prof. Jones was most enthusiastic about the use of pre-emergent herbicides in control of a wide variety of weeds infesting corn, soybeans and a variety of crops. It was also pointed out that through the continued use of sprays such as 2,4-D and other herbicides, a weed resistant to this chemical and others, and had become a real menace to the crop that was being grown.

The newer types of chemicals applied after seeding and before the crop has germinated were filling a real need and it was a case of following a system of prevention. Jones. It is now possible to grow a crop of corn for instance, without weeding and without cultivation. It is easy to cultivate corn that isn't needed and it is a waste of money. This corn should be cultivated or hoed regularly as long as the crop permitted.

A great deal of work has already been done on this new approach to the weed problem and there may be much yet to do. It is hoped however that some of the new herbicides now being used in Halldimand may be done in Halldimand on the heavier types of soil.

Ontario and the Ontario Department of Agriculture and Food are sponsoring a series of demonstrations of weed control in corn and soybeans and the necessary action will be taken.

### Who Will Be The Dairy Queen of Halldimand?

#### SUMMER ADVENTURE

A dozen university students are spending the summer doing voluntary work among the Eskimos at Prosh. They will be in the Yukon Territory, working among the Eskimos and unloading ships. Girls are cooking and doing the laundry. The students are working among the Eskimos and unloading ships. The girls are cooking and doing the laundry. The students are working among the Eskimos and unloading ships. The girls are cooking and doing the laundry.

Applications and entries will be received by the secretary of the Halldimand Dairy Princess Committee, Mrs. Howard Hewitt, R.R. 2 Hagersville, Ontario, on Friday, August 23rd, at the Rotary Club Centre, when the drawing of the Princess will take place.

The desire of the members of the Student Christian Movement to get to know the Eskimos better by working among them is an ideal which the spirit of adventure is still alive in Canada.

They are not the only civilization dwellers spending all or part of the summer in remote parts of Canada. To mention a few:

The Mines and Technical Surveys Department is sending out 76 surveys mainly to Arctic regions to be used by the local dairy organizations in the county. The surveys include maps, charts and aerial photographs.

Army engineers, who spend nine months of the year in centrally-located headquarters in Ottawa are surveying wilderness areas in every province and the territories.

Doctors and x-ray technicians, working from the government supply ship C. D. Howe, are visiting 30 remote Eskimo settlements in the eastern Arctic as far north as Ellesmere Island, administering chest x-rays, inoculations and physical examinations.

Setting for some of the smaller dosing of the outdoor life, thousands of small children are leaving the city for the vast areas of provincial and national parks.

Add to these the city-raised workers now busy on the DREW (Distant Early Warning) radar line and man-made weather stations and it becomes evident the call of the wilderness beckons to Canadians.

### Floodlight League Play-Offs Get Under Way Next Week

The regular schedule for the Halldimand-Norfolk Floodlight League was completed last night when Mt. Hope met Comstock, but four games remain to be played which can determine the champion.

The rainout of the second place team, Comstock, will have two games with Mt. Hope and one with Villa Nova Co-ops. The same number of games will be played with Selkirk, but the result of this fixture is likely to affect the standings. It is likely that Mount Hope and Co-ops will each play a single pointed game with Comstock so that with Jarvis for the League Championship and the Cliff Weaver Memorial Cup.

In any event the league play-offs will have to be completed a couple of days prior to August 15th as the first game of the night in the first game of the O.A.S.A. play-offs at Jarvis meet Hesper on that date.

The first two games of the best of three play-offs for the League Championship will have to be completed by the end of next week with place on Monday or Tuesday night, Aug. 12th or 13th.

This past week saw two thrilling games with Jarvis' rival Mount Hope. The Hopes emerged victorious in both these contests, but in each instance the fans were provided with plenty of thrills. Last Thursday night the game at Jarvis went broke loose and swayed up the game with a three run barrage. On Saturday night the game at Mount Hope was a 1-0 score. If the league standing it will make in a game with the Jarvis Hesper's for the League Championship.

Jarvis took a 4-4 decision from last week's game of the league play-off with Selkirk. If any game is a home game for them.

It will likely be action at the hall park on Thursday or Saturday night for the league championship.
