6 inches long threaded at one end to fit the ignition chamber of the engine and welded at the top. This was kept red hot by a gas burner that was in a piece of 2½ inch iron pipe about a foot long. These tubes would last anywhere from two hours to two days, when they would blow out. Later on when they would blow out. Later on a nickel steel tube was made that would last up to two months. Even with the addition of the power, 95% of our hammocks were produced on hand looms.

> square, set on top of a cast iron cook stove. We had two of these kettles to dye the yarn and cord. The dry-ing was done in the other part of the "lean-to." heated by "got in "lean-to," heated by gas in a box stove. We made an agreement where-as my father was to receive \$1.25 a day; John, Alec and myself \$1.10. Two years later we purchased three other power looms. One was used to manufacture lap robes used to protect a person from the dust while driving in a buggy, the other two to make portiers or door curtains.
>
> In 1905 we built a small building that we used to dve and dry our years.

that we used to dye and dry our yarn and cord. The kettles here were a-bout five feet long and three feet both live feet long and three feet wide and were set in brick and fired by gas which we were buying at 20c a thousand cubic feet. In 1910, we built the first brick building 40x72 ft. at a cost of approximately four thous When we first came to Dunnvill

In 1926 the charter of the Dominon Hammock Mfg. Company Limited
was surrendered, and the Dominion
Fabrics Limited (the present company) was formed.

In 1927 we carried the two-story
and basement building, out to the
railroad property line. In completion
of this addition we purchased 16 fully
automatic terry towel looms. Later
on we purchased other automatic bedspreads and drapery. Since the on we purchased other automatic bedspreads and drapery. Since the looms to replace the first towel looms close of World War II. we have spent that we had bought. When we built approximately one million dollars in the addition to our main building in Dunnville and three hundred thousand 1927, we also built an addition to our in Welland. Our employees number

in Welland. Our employees number dye and bleach house. This necessitated the removal of the frame building that we commenced operations in.

In 1930 we purchased property on the north side of Forest Street, and in 1932 we built a one story building and transferred all our looms and preparatory machinery from both buildings into a new addition, putting individual motors on our automatic towel looms, which now total 100. We also purchased some wide looms and commenced the manufacture of bed-spreads. These looms however, with

spreads. These looms however, with the looms we had moved out of the original building, were all belt driven. In 1933 we purchased the property and the building of the F. R. Lalor mers.
