NEW FARM SERVICE FOR THIS DISTRICT

A new farm service that brings a complete feed processing plant right into customar's farmyards has been started in this area by Wray Buckborough, Hagersville, in conjunction with Hunter's Farm Supply, 11 Main St. S.

In announcing the new operation, Mr. Buckborough, owner, said that the new "mill on wheels" is expected to be a godsend to local farmers and feeders who want to utilize their own grains and roughages for feeding of livestock and poultry. One of the main advantages of the new service he said, is that it brings the mill to the farmer instead of the farmer having to take his grist to the mill.

Consequently by eliminating all that feed handling, the new mobile farm service saves feeders a tremendous amount of time, labour and money, according to the equipment's owners. Increased emphasis is also placed on better nutrition, enabling farmers to get high production and greater profit from their meat, milk and eggs.

Cyclist Travels Long Distance

On Monday afternoon this week, a young cyclist stopped at Jarvis for a rest. He informed the Record that he had rode all the way from San Francisco. He informed us that he was 19 days coming this far and his average milage for a day was 160 miles, although some days he had made 200 miles. He was riding an English racing bicycle, with three speeds. He said he travelled light, carrying only a small thermos bottle and a light raincoat.

He left Jarvis Monday noon, and hoped to be in Fort Erie by evening. His final destination was Boston, Mass.

The participating interest, however, will be in front of the Governor Simcoe Hotel where the visitors meet for lunch. The 50 cars will afterwards form a cavalcade to proceed to Harewood Acres.r

Newspapers and radio and TV stations in Toronto, Hamilton, London, St. Catharines, Galt and other centres will have representatives participating in the event.

ON THE FARM FRONT

Brief Notes for the Busy Farmer

BY HALDIMAND HARRY

The total rainfall for the month of May up to May 23rd stands at 1.61 inches which is 1.3 inches below last year and 1.06 inches below the average for the past eight years. Combined with this, the rather cool conditions have been keeping growth back. So far the temperature has dropped to freezing or below on three different occasions during the month. On May 2nd it was down 31 degrees; on May 6th, 30 degrees and on May 21st 32 degrees. All these temperatures were taken at the Rural Youth Centre and in the Stevenson Screen which is approximately four feet above ground. The temperature at ground level will be three to four degrees lower still. For instance on the 21st the temperature at ground level was registered at 28 degrees.

The time is approaching when a Haldimand entry for the Dairy Queen Contest will have to be selected. A meeting has been called for this week to make plans for the local contest.

T. C. Adams, Dairy Istructor for this region is the chairman of the local committee. It is hoped there will be a large number of Haldimand girls who will take part in this interesting contest. This is the year when Haldimand should make a special effort to win this contest and have the Dairy Queen in our midst.

Arrangement has just been made that the Hog Producers' Vote will take place on Friday, July 25th. Voters' lists will be prepared and an official court of revision will be held on July 4th. Appeals against any decision of the court may be made on July 14th, 15th and 16th after which no further names can be added to the list. Announcements will be made later as to the location of the polling booths and hour of voting. In the meantime it is important that every hog producer make sure that his name appears on the official voters' list.

The Brucellosis campaign is rapidly drawing to a close. So far seven township have been checked and the tests certified by the township clerks. Three remain to be done and they should be completed within a week or ten days. The average for the seven townships now completed shows 91.00 per cent in favour of the proposed scheme. It is not anticipated that much change from this figure will result from the other three yet to be certified.

—o—

Some farmers have been taking a look at the zero grazing method of feeding the dairy herd and they have discovered that more feed is harvested per acre with less waste from tramping and manure. No fences are required and there is less damage to the land through the tramping of the cattle. The water supply is always under control and a constant check can be kept on the salt supply. However these farmers have also found that a higher investment is required to take care of the extra equipment. Much closer management is needed and more labour is required. What's more it is a daily job, week day and Sunday.
