

We said goodbye to John Martin and Hazel this week and frankly we were sorry to see them go. Since coming to Jarvis a little over three years ago they have contributed everything one might expect and a little more to the business and social life of the Community. Both were active in the life of St. Paul's Anglican Church. From that solid base, they took part in just about everything designed to advance the progress and welfare of the Community.

Hunting, fishing, baseball, softball, hockey, bowling, bridge and chess were a few of the activities that brought John into close relationship with all segments of the rural community. His interest in these activities was real. Local sports teams had no stronger supporter than John Martin and only those who have tried to sponsor such organizations can fully appreciate what that means. His enthusiasm for fraternal and service activities was no less real.

As he leaves Jarvis two new buildings are in the course of construction. One is a new house which will be occupied by the local bank manager and the other is a new bank building on Talbot Street. Both of these projects accrue to the credit of John Martin. We think most people appreciate what this means to the community by way of new assessment.

We can't blame him for leaving Jarvis because his new appointment will be an advancement in his career. If his efforts are as effective in Beaverton as they have been in Jarvis we predict he will soon be moving to another location higher up the ladder and one day Beaverton will view his departure from their midst with the same regret being felt locally.

We leave behind our personal relationship with John Martin and not just because we found it slightly easier to get a loan from him than from our experience with other

THE CANADA FARM AND INDUSTRIAL EQUIPMENT SHOW

The Canada Farm and Industrial Equipment Show 1960 promises to be the biggest All-Agricultural Equipment Show ever to be presented in North America. Over 100 manufacturers and Distributors of Farm Machinery will display the latest developments in their lines on a space of 65,000 square feet within the C.N.E.'s Industry Building. Every possible inch of exhibition space will be utilized for display purposes. Even the aisles have been reduced to provide sufficient room to meet the demands. It has been necessary to ask several exhibitors to wait another year, since adequate space was not available.

Displays ranging from tiny seeds to huge combines, from hand tools to giant earth-moving machines, will be presented for the benefit of the varied audience. If you are in any way connected with Agriculture, Excavation, Road Maintenance, or just plain Gardening, then you can benefit by a visit to this Show. No matter how big or small your operation, you are bound to find something there that will make your job easier and more efficient.

Every facility is provided within one vast building, reached by easy access, with ample parking for any number of vehicles. You may even take streetcar service from downtown Toronto direct to the door of the Industry Building. Regardless of the temperature outside, the buildings are warm and cozy. They are clean and well-lighted, and all services are considerably appointed. You may enjoy a first class meal in the Dining Room, or a snack or sandwich from the numerous Snack Bars provided. The doors are open daily from 10:00 A.M. to 6:00 P.M., and your home-town paper will tell you where you may secure a Guest Admission Badge permitting you free admission at any time.

The latest developments and the best workmanship will be shown, not only by North American firms, but also by those from far away places. Exhibitors will be on hand with their

ers Association - some 16 years ago. Under a name that was known by that name, "The Orford Show", but a number of reasons dictated some changes. No change was actually taken place in the sponsorship or purpose of the exposition. The first thought of the Association was to have a year at least, Farm Equipment Dealers should gather together for the purpose of a general review of all the offerings being made to their Farmer Customers; that by seeing, examining, and comparing each others' equipment displayed, they could be much better equipped to advise and assist their clients.

The fact is that the show has been good for as it has been nurtured and promoted through the years it has grown. In fact, it has reached a stage where its growth and development seems almost phenomenal. Best of all, however, it has grown to include not only the Dealer and the Manufacturer, but its greatest audience - visiting guests of these people and the Consumer and his family. Also visiting the Show will be Engineers, Designers and no end of leading Sales personnel, seeking new ideas and information. In spite of everything, the most benefit is bound to go to the end user who can see and examine to his heart's content.

The combined efforts of the Show Directors appointed by the OREFEA organization, in cooperation with the Exhibitors, make this Show possible. The Show Directorate comprises Mr. D. A. Duziel, International Harvester Dealer, St. Catharines, Ontario, Treasurer; Mr. Robert Harvey, Oliver Dealer, Sparta, Ontario, Vice-President; and Mr. L.L. Sykes, Manufacturing Director.

Men whose greatness was not realized, and certainly never recognized until long after their passing, did much in the interests of Agriculture. Their inventions, and in instances crude improvements on still cruder implements, did much to remove the drudgery from the Farmer's work-a-day world. There still exists that determination and inventive genius within man, as the numerous displays will attest. The Manufacturers exhibiting in the Show have within their organizations the people and the means to continue to design in the interests of the Farmer, to assist him in his efforts to yield a greater production with less effort.

All those who contribute to the production of this tremendous Show will be waiting with outstretched hands to welcome you and yours on the last four days of January at the C.N.E. in Toronto. All will be decked in their finest array. The machines will be glistening and glistening, and radio and television personalities will be on hand to add gaudy music for your pleasure. This will be a time of Mardi-gras for the lowly Farmer Machines that work so hard all the rest of the year.
