Just like milk - Butter belongs on your family table!

When the wonderful spring weather comes, such as we experienced on Monday of this week, our thoughts turn away from writing a newspaper column and we look with a certain amount of chagrin at the beds of tulips we planted a year ago.

Proof of the fact is that the flowers we plant never develop into healthy specimens. We have one tulip bed where about fifty bulbs were put in and, by actual count, we have produced fourteen scraggly specimens that are as tall, lean and undernourished as the plants.

Despite the fact we can't grow things ourselves we, nevertheless, admire anyone who can and the results they get.

Next Monday will see another Victoria Day Celebration in Jarvis. As usual the celebration will officially get underway with the Calithumpian Parade at 1 P.M.

Miss Emily French of Hamilton, her brother the Rev. A. C. French of Youngtown N. Y. and a cousin Mr. Carrol Lewis of London, England.

A VILLAGE CHANGES

The year was 1898. The scene an Ontario village.

A local historian, reflecting on the things she remembered about the village, wrote that the village had "No electricity, no stone roads, no radio, no telephone, just coal oil lamps for light."

Today in her village the coal oil lamp has vanished, pavement covers the dirt roads, and telephones, radios, and electric lights are taken for granted.

These changes were possible because of steel. In 1898, Canada made less than 10 pounds of steel per person.

Last year, the country's steel industry produced 660 pounds of steel per person.

This higher productivity comes from the factories Canadians have built. For example, The Steel Company of Canada, Limited has invested nearly \$365,000,000 in plants and equipment since the Company started operations fifty years ago.

Canadians produce more mainly because Canadian companies are continually improving their plants and equipment.
