THE TRUCKS THAT RIDE SMOOTHER. **WORK HARDER, LAST LONGER!**

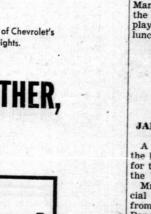

Just a year ago, Chevy came up with a torsion bar independent front suspension and has already put some 300,000 Chevrolet trucks with it out on jobs.

The ride that results from Chevy's suspension design is making life a lot easier for drivers. (Just ask them!) It's taking better care of loads, the fragile kind that used to cost somebody money if they were bounced around. Chevy's ride also enables truck owners to revise their buying habits and work their trucks longer before they trade. This follows naturally. The trucks take less of a beating. There's less stress on sheet metal. Less abuse to tires. Less pounding to wear out parts before their time. The upshot of it is you either save money or earn more of it, or both. And you couldn't ask a truck to do more than that. See your dealer.
