

IN THE ORBIT OF OUR EYE!

Francis Law implied the other day that she thought it was about time this column was revived. The truth of the matter is it is the author that needs to be revived. He has found the quintessence of youth in the past...

HALLOWEEN

Hamilton, Ont. Dear Mr. VanVoort: David Wright didn't have anything to do with it. I say this a year too late, Mr. VanVoort, but then I just found out about it yesterday. You see, Mr. VanVoort, I approached your store last week and saw David hanging about outside, as indeed, he has been doing for some time now...

MRS. K. STENGEL

ENTERTAINS W.L. Mrs. Kenneth Stengel entertained the Jarvis Women's Institute at her home when plans were made for catering for the Flomen's Banquet on October 27 and the Buttermakers on Nov. 10.

Fact we doubt very much if such an event could be carried out so well and so sincerely anywhere else but in Jarvis. Where else could you find people who would work tirelessly for weeks to provide an occasion that would bring joy to an editor's heart that will be a constant appreciation as long as he lives.

Mrs. R. A. Miller opened the meeting by reading a poem on "Autumn" written by the late Mrs. Mary Clark, a former president of Jarvis W.I. Mrs. Alan Lumby was in charge of correspondence.

Mrs. W. E. Craddock convened the program arranging a contest with Mrs. Bett as winner. Robert Dueser dealt with the motto "Work with the Construction Gang, not the Wrecking Crew."

Mrs. William Bailey who stated that she had been closely connected with "Building Supplies" for more than 40 years demonstrated her talk in the form of a social get-together at the home of Mrs. Wm. Henderson.

There is just one thought that we would like to convey this week and that is that we are extremely grateful for such a tremendous manifestation of kindness and goodwill. These arrangements were spear-headed by Bruce Stedder's friend and political cohort, Ernest Craddock, along with his committee, and your previous references of a derogatory nature we would be.

CHURCH NOTES

UNITED CHURCH W.M.S.

The W.M.S. will meet on Tuesday, October 25th at 2 P.M. All interested ladies are invited to this special meeting at which Mr. Donald Powell of Hagersville will give an illustrated address on his recent trip to Africa.

ANGLICAN CHURCH NOTES Last Sunday was Children's Day, and was appropriately observed. At Nanticoke a special Children's Service was conducted at which the Lessons were read by Winnifred Jackson and John Lockyer.

WOMEN'S CLUB MEET St. Paul's Women's Club met at the home of Mrs. George Keefe, for the monthly meeting on Tuesday, October 24th.

St. Paul's Women's Club met at the home of Mrs. George Keefe, for the monthly meeting on Tuesday, October 24th.

Mrs. Ray Montague explained the "Why I Am a Member" of the Catholic Women's League. The Father Beck exhorted the guests to become members of the W.L., not for their own future, but for the future of their children.

The President reminded us of the Fall Luncheon Meeting to be held in Hamilton, Ontario, on November 11th.

HOUSECLEANING OF THE church was then discussed and Tuesday, October 18th was the date set for doing this. On Monday, October 24 was set for scrubbing the basement floor in preparation for painting.

Mrs. Chas. Meahan, Education Convener, gave a report of the St. Catharines Diocese, its organization, and the organization of the Diocese C.W.L.

The President reminded us of the Fall Luncheon Meeting to be held in Hamilton, Ontario, on November 11th.

Some people in the Church volunteer for the hard jobs - others must be drafted.

EBENEZER CHRISTIAN REFORMED CHURCH 10.00 A.M. - Morning Worship Service 7.30 P.M. - Evening Worship Service in the Holland language.

ONTARIO MILK PRODUCERS' STUDY MILK MARKETING A study of milk marketing in Ontario will be made by a team independent of government or the dairy industry, according to J. L. Baunton, executive director of the Ontario Milk Producers' Association.

The study team which has been authorized by the Marketing Committee, is composed of David L. Macfarlane, Professor of Economics, Faculty of Agriculture, McGill University, and Economic Consultant, Quebec Agricultural Marketing Commission; John W. Wood, New Jersey; and W. Wood, Agricultural Economics, University of Manitoba.

The study team's work will be directed toward an examination of the present marketing situation in Ontario, and the study of this complex problem.

Although the weather these past few days does not make a person think of Christmas, it is coming and not too far away.

The Jarvis Boy Scout Group is preparing to hold a canvas to sell Christmas Cards. The proceeds of this sale will go towards buying some of the boys' needed equipment.

The boys have a very nice selection of cards and wrap at a low price range. Support your local Scout Group. We thank your cards now. We'll thank you later.

Applied to the production and economic conditions existing in the Province of Ontario, it is quite possible that some have already been brought in for over. The long spell of excellent weather has made it possible to keep the herd outside rather than being confined to the barn during the day. A cow that is not moving about freely will find it difficult to be confined closely at night and then letting them pasture during the day. A cow that is not moving about freely will find it difficult to be confined closely at night and then letting them pasture during the day.

Twenty-five boards were approved under the Bear Penning Policy during the month of September 1950. They were submitted for inspection by seven breeders across the province during the greater part of the month across the province was 2.9 per cent.

It would appear that the sales of feeder cattle this fall are being classed as satisfactory although prices are down from a year ago. This is reported that good feeder steers at the Grey-Bruce Sale sold at \$21.00 to \$23.00 with a few lots some slightly higher. The bulk of the steer calves went for \$20.00 to \$23.00.

Some experimental work is being done on the development of four-wheel brakes on tractors which would tend to reduce accidents. This would be especially helpful in hilly areas. Cornell University engineers have tested this equipment on tractors already with and trailing loads and have found that tractors so equipped had about double the braking force. Furthermore, four-wheel brakes tended to eliminate many of the jackknifing and sliding accidents with trailing loads.

Creamery butter production in Haldimand County jumped up to the extent of almost 100,000 pounds in August this year as compared with 20,000 pounds in August 1949. This brings the total for the year thus far to 20,000 pounds higher than last year at the same time. The actual production for the month of August this year is reported to be 269,747 pounds as compared with 183,800 pounds for the same month in 1949. This is a big increase and hard to explain except that pasture conditions had been fairly good during the greater part of the month across the province was 2.9 per cent.

BELL TELEPHONE COMPANY NEW ELECTRONIC LARYNX

A battery-powered electronic larynx for persons who have lost their voices through surgical treatment, paralysis of the vocal cords, or other causes is being marketed in Ontario and Quebec by the Bell Telephone Company of Canada.

The price for the electronic larynx which will cover the cost of manufacturing only, is expected to be about \$45. Information regarding the device to be made available on a first-come, first-served basis because of the limited initial supply, can be obtained at any Bell Telephone office.

Developed by Bell Telephone Laboratories, the electronic larynx will be of non-profit basis. The instrument resembles a streamliner in a controlled manner to fit the electric razor, controlled by a hand and designed to be held against the side of the throat while being operated. Speech is produced by forcing words with lips and tongue to pass through the throat.

The electronic larynx will be produced in two models, one which simulates the female voice, and another which simulates the male voice. Both models operate on a user control basis, enabling the user to vary the pitch of his voice over a half-octave range in order to give more emphasis on words or phrases.

After practice this control can be made so that the user can produce speech intelligibly and naturally. Speech volume is equalized. Speech is produced as if by a normal talker speaking at a normal conversational level.

The instrument makes use of Bell Transistors and is powered by

WOODS YOU TOO CAN MAKE MORE MONEY

Learn more about the profits in forest woodlot operation. Millions of dollars are made each year by Canadian farmers who know how to convert their woodlots into extra off-season profits.

ON THE FARM FRONT Brief Notes for the Busy Farmer - By Haldimand Harry

What to do in case of a power failure may not be of very much interest at this season of the year but it is a good idea to be prepared. In keeping with this thought the Ontario Department of Agriculture has recently published a little booklet entitled "Emergency Electricity" which can be had for the asking at the office of your agricultural representative. This booklet might easily save a farmer from being in a very awkward situation with 30 or 40 acres of milk and no power to operate the equipment. The information includes a list of the equipment needed, its construction, wiring connections, and safety precautions.

This has been an excellent fall for the taking of soil samples for testing at this season of the year but it is a good idea to be prepared. In keeping with this thought the Ontario Department of Agriculture has recently published a little booklet entitled "Emergency Electricity" which can be had for the asking at the office of your agricultural representative. This booklet might easily save a farmer from being in a very awkward situation with 30 or 40 acres of milk and no power to operate the equipment. The information includes a list of the equipment needed, its construction, wiring connections, and safety precautions.

Be sure to run the tractor for a time after adding water to the battery. This is the advice of the agricultural engineers of the Ontario Department of Agriculture. During the winter months it is quite possible for the water to freeze if it is not properly mixed. The generator is completely stopped before attempting to make any adjustments or to try in any way to remove the leaves or cobs from any part of the machine.
