But I can't spend my telephone money!

This is a true story. One of our telephone people recently passed a neighbourhood lunch counter where some children were about to order a second round of milk shakes and soft drinks...

PREPARING FOR NEXT YEARS CROPS

(continued from page one) Utilizers on hay and pasture fields may continue until freeze up without loss of efficiency.

In fact no losses will occur even if the ground is lightly frozen before the fertilizers is the most efficient and labor saving method of application...

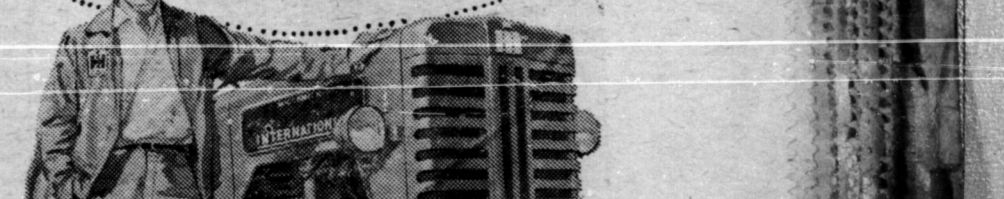

Under conditions where early spring applications of Nitrogen is recommended, it is suggested that pastures, hays or fall fields be top dressed with urea about October 25th to November 15th or until freeze up if soil conditions permit.

Judge tractor PERFORMANCE for yourself!

Put tractor claims to the acid test. Catalogs can be read in an easy chair but you have to be in the tractor seat to get the real story on performance.

WE INVITE YOU to get into the extra comfortable seat of a new IH tractor... and have a prove-it-yourself demonstration on your own farm.

See or phone us now. We'll run over with the IH tractor that meets your type of farm and power requirements. We'll let performance speak for itself. Then you be the judge.

Let us demonstrate! You be the judge. Doughty & Williamson, Jarvis, Ontario. Phone 587-2273.
