Brief Notes for the Busy Farmer

This also is the time to take those soil samples from the fields that you intend to put down with winter while. Get the samples in early so there will be no undue delay in getting the report back to you in time to order the fertilizer for fall planting. Remember the requirements of the wheat crop may be considerably different from those of the cornicrop or even the oat crop and if there has been any crop on the field since you last had a test it is altogether likely the soil fertility picture has changed considerably. For full information on taking the samples and the method of handling these after can be obtained from your agricultural representative.

At the end of June it was reported that the end of June it was reported that the parketing across Canada had dropped by 16 per cent as compared with the same date a year ago. The heaviest drop was in the West (20 per cent) with the East following with 13 per cent. Only the Maritimes had an increase and it was a low 2 per cent. It has also been reported that weather conditions in the West will likely have a downward effect on marketings there. In some areas, however, it is reported that weather conditions in the west will likely have a downward effect on marketing across Canada had dropped by 16 per cent as compared with the same date a year ago. The heaviest drop was in the West (20 per cent) with the East following with 13 per cent. Only the Maritimes had an increase and it was a low 2 per cent. It has also been reported that weather conditions in the west will likely have a downward effect on marketing across Canada had dropped by 16 per cent as compared with the same date a year ago. The heaviest drop was in the West (20 per cent. Unly the East following with 13 per cent. Only the Maritimes had an increase and it was a low 2 per cent. It has also been reported that weather conditions in the west will likely have a downward effect on marketing across Canada had dropped by 16 per cent as compared with the same date of year ago.
