It was stated by the University
that the degree was being conferred
in recognition of Mr. Allan's great
contribution to the political life of
this Province and the Dominion of
Canada. Certainly the distinction
is richly merited. We can recall no
political representative from this
constituency who has given more assiduous service and outstanding leadership than the Hon. Mr. Allan.
First as Ontario's Minister of High

Treasurer, Mr. Allan has served the
Province ably and well. He is reccognized as the senior Minister in the

has always found time to give to his
home constituency. Both the Counties of Norfolk and Haldimand have
benefited immeasurably from his interest in their behalf.

TIPS

ON A FAST,

SAFE START FOR CALVES

Heifers on the Purina Farm calve 4 to 8 months ahead of average. That means they give around 3,000 lbs. of milk before most heifers have even started producing. Why don't you try it! 1. As soon as the calf is dropped, cut off the navel cord about 2 inches from the calf's body and soak the stub in iodine to prevent infection.

2. For the first three days leave the calf with the mother so it can get the first colostrum milk which helps regulate the digestive system. Milk to even pressure in all 4 quarters, but do not empty udder completely. Guard calf against draughts and dampness.

3. For the next ten days, keep calf in an individual pen. Pen should have clean bedding and be disinfected with Purina Disinfectant before calf is moved in. 4. On the fourth day start feeding Purina Nursing Chow in gruel form 1 lb. re-places 1 gal. milk. Continue for four

weeks. Calf should have clean water and rock salt available free choice. 5. Self-feed Purina Calf Startena from 4 days to 4 months, adding bright leafy hay at 2 months. 6. After 4 months change to a Purina heifer growing program.

Why not give me a call, or drop in at my Store with the Checkerboard Sign and let me tell you how Purina feed-ing has been paying off for many of your neighbours,
