## Amazing Courage Of Lucy Fray

It was Lucy Fray's tenth baby. She had been back home with it only a week when she learned that she was going to die. The one thing she didn't know just then was when - whether t would be a matter of weeks,

months or maybe years. She did not tell her husband, Ivan, right away He was bedridden and she wanted to be absolutely sure before she broke the news to him.

Lucy was thirty-four years old. She and Ivan eked out an existence on their small farm a mile or two from Ottumwa, Iowa. There was no luxury, but it was home to them and their ten children.

When Ivan was able to, he worked in the field. In the winter months, he found a job in town as a labourer, but lately his arthritis had been so bad that he had been more bedriaden than up and about. As the days went by, Lucy's

pain grew worse. She was evenmally forced to drive into town to see a specialist and the eldery family doctor who had attended them ever since they came to live there.

When the specialist had completed his examination, he shook

for me, then?" she asked quietly. "There is nothing that any uman being can do for you,

She looked steadily at him with great saucer-like grey eyes as she asked: "How long have I got, doctor?" "Do you honestly want me to

express an opinion, Mrs. Fray?" the specialist queried. make arrangements before I

"You have a matter of months. six months, maybe nine months, at the very, very best, about ten Lucy Fray murmured a simple thank you. There was neither

tremor nor emotion in her voice or face. She returned home, smiling and bright as always. No one saw that inwardly she was disturbed, that sentence of death had been pronounced on She bathed her infant son Ste-

phen and scraped together enough food to feed the family. She then told her husband she

discuss with him," Lucy said, and Ivan did not question her. He was in bed racked with pain. In the quiet of the minister's parlour Lucy addressed the Reverend Samuel Pike.

"I have been thinking about my children. I was bathing Stephen this evening and thinking that I do not want them to go to an orphanage when beside me I felt a wonderful presence, something strong and overpowering like an invisible spirit. "It told me that there must be

many good people in Iowa who would provide homes for my children and love them as I love them and help them to grow up to be good men and womer. "I have to find these people and see that my children are set-

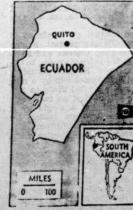

tled happily before I go." told Ivan that she was to die before the summer was halfway through in that year of 1954. She outlined her plan and he agreed as he always did with anything that Lucy decided.

Next morning Lucy got her children together and told them they were all going to move to new homes.

'Soon I will not be able to take care of you any more because I shall be going to heaven Before I go I am going to find each of you a new mummy who will be as kind and good to you as I have been, and a new fa ther who will love you as your own father loves you." The local newspaper picked

up the story of the dying mother who was seeking loving homes

How Well Do You Know SOUTH AMERICA?

for her ten lovely children; the newspapers in distant Des Meines, capital of Iowa, picked it up Soon the story of Lucy Fray was on the front page of

Chandler in "Tit-Bits." Couples motored hundreds, and claim a child, but Lucy was not handing any of her children over just yet. She had listed the qualifications she demanded of anyone who wanted to adopt a child of hers.

Those couples of whom Lucy approved were allowed to take one of the children with them for ten days. At the end of this period the child had to be returned so that Lucy could ques tion it privately to find out if he or she would like to live with the people and if they were The youngest, Stephen, was

the first to leave the house, then three-year-old Warren went. When Linda, two years, had gone, the other children began to get frightened. At first it nad seemed like a game, but now they suddenly realized that it was deadly earnest.

The oldest, Joanne, and the third oldest, Pauline, asked their mother to tell them the truth. "I am going to die and nothing can help me," Lucy said calmiy. "I do not want to see you

children in an orphanage. I want to see you in happy homes with people who will love you, people who will allow your brothers and sisters to come and see you and allow you to go and see them so that you will always be a family - my family." The children understood. More

and more of them left. Most went to neighbours living not very far away. By April, 1954, all but three had gone. These were Joyce,

Frank and Virginia. Then Joyce and Virginia went. Little Frank alone was still with her in May when Lucy then knew that her time was short. Little Frank was six years old and suffered from attacks of epilepsy. To Lucy it seemed that nothing could be done except to put little Frank in an institution. For she had been fair all

the way through. The couples who took the children were told of any failings they had, and Lucy had, of course, told them that little Frank, a tousled haired lovable little fellow, suffered from epileptic seizures. "No one will accept Frank," Lucy told the Reverend Pike. "and yet he is the most lovable

of all my ten children and the one who needs love more than any of the others." Then, a few days later, the couple who had adopted Warren brought him to see his mother. They were sitting on the porch while Warren was with his mother, when little Frank came

They spoke to him. Little Frank said: "No one where they look after little kids no one wants." Then he toddled off to play with a clay horse

toddling out and stood by them.

while the couple watched. That evening neither the man just sat and stared at our food, my wife and I. We could not eat, we did not have the heart to eat," the man told the Reverend Pike later.

"Suddenly my wife said to me: 'He is such a lovely little boy, it is a shame that he, too, cannot have a new mummy and daddy like his brothers and sis-

"I looked at my wife and I saw her eyes brimming with tears. Suddenly I rose and said: 'Come on, little Frank is going to come home with us." Lucy smiled up from her bed when the couple returned later that evening. Gently they took the sleeping boy from his bed

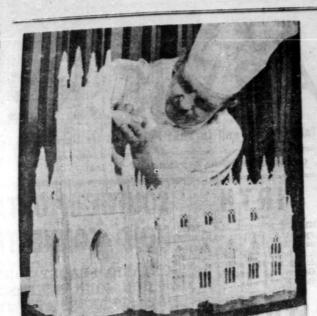

and when he awoke the next morning he was in the bedroom where his brother was sleeping. On the morning of June 14th, Lucy knew her life was ebbing fast. Her husband sent a mes to the Reverend Pike and later in the day the children begar to arrive until they were all around her bedside.

"I want to say goodbye to you," Lucy said calmly. "It is not goodbye for ever, because I know I shall see each of you again. You have found parents who will be good and kind. "Be to them good sons and aughters Goodbye now and

God bless you." She kissed each of the children on the cheek and looked after them as they filed out and then she turned her head away and one solitary tear rolled on to the

pillow.

When the nurse tiptoed into the room a few seconds later Lucy Fray had gone. But there face and a smile on her lips.

little more dressing.) Serve on lettuce. Serves 6. OPEN CLUB SANDWICH Arrange lettuce leaves on exiangles of toast. Cover alterate pieces with slices of cook-ed chicken; cover other pieces with slices of tomate and cooked

## Air Patrol In California

On California highways, where 8.1 million motor vehicles rocket around and ten persons are killed every 24 hours, it used to be pot-sible to drive like a bat out of Sacramento if the cops didn't see you. Not so much any more. Eighteen state highway patrolmen have been assigned to an air-traffic patrol over the Central Valley. "Big Brother is Watching You-From the Sky" the program is dubbed, and it is proving effective.

Just how effective, a NEWS-WEEK reporter learned last onth in a demonstration staged by pilot-patrolman James Simmons, a 6-foot-2 major in the Air Force Reserve.

After a pre-dawn, below freezing take-off from Sacramento Iunicipal Airport, Simmons picked up the concrete ribbon of Hwy. 99 that stretched arrowstraight through the flatlands below. Plainly visible were numapart. If a vehicle moved from one mile-marker to another in 60 seconds, Simmons paid him no heed. The driver would be 5 miles an hour under California's maximum speed limit of 65 mph.

As the blazing sun inched upward over the 2-mile crest of the Sierra Nevada. Simmons was attracted by a black coupé, its "peekhole." He clocked it. The time measured between markers was 45 seconds—or 80 miles an to 200 feet. Using his hand mike, he called: "Aircraft No. 2, calling

ahead," came back the reply. "A black coupé with wind-shield and rear windows frosted is going flat out south near Elk Grove. Pick him up and investi-

"Roger, Aircraft Two. Unit Six over, out," was the reply. Simmons pushed his cub to 500 feet and "hung on the tail" of Combine sugar, eggs, salt, and concrete. On its top was a white square with a black "6". As the Last, add mincemeat and oatmeal.

Drop by spoonfuls on a cooky speeding, unsuspecting motorist rushed by, the highway patrol sheet. Bake 10-12 minutes at 400° - 425°F., or until cookies flagged down the car. Minutes later, Simmons noted

a car stopped by the roadside, a nan standing alongside. He 'dragged" the vehicle so low that two children could be seen in the back seat. Over his loudpeaker came the words: "This is the California Highway Patrol. May I assist you?' by the voice of Big Brother. She

right hand," Simmons ordered. She raised her right hand. "I will send assistance. Wait in Monitoring his police band, where about 300 B.C.

Yet, there it is, and it is so. utilitarian aspect—although that word didn't occur then. When it tipped over you didn't have so attached to the winter ses of horses, were supposrepair if it got smashed up. Everybody had a pung, but the

ed to be a warning device. Wheels on wagons clattered and bumped, and hoofs of horse burney n snow fell these hersy ads were muted, and bells had ched to warn folks of ning. If this is true, then we have the intellectual right to me that a foghorn or the g on a trolley car had the relative chance of becoming istmas music. Indeed, to anywho ever endured the true pleasures of sleighing the odds would be about the same.

ould like to take all memof the musicians' union for a old-time ride in a set-over ung, o'er the fields we'd go, hing all the way. The setver pung was a realistic answer something the song-pluggers ouldn't know about—it permitwouldn't know about—it pet.mic ted you to pass with some sem-blance of ease over roads that were owned by teams. Sleigh-riding was incidental,

or the business of the country-ide was conducted on double side was conducted on double runners and double - hitched horses. Never, by any stretch of the fancy, did a sleigh ride over a country road entail frivolity with dash, zip, verve and hooraw. If you daringly touched the horse up, throwing caution to the winds, you would round a bend winds, you would round a bend to be a longing rig loaded. and meet a logging rig loaded igh with four to five thousand eet and a driver on top who ouldn't care less. The sleigh urned out, and at high speed or w speed it usually tipped over. en the bells on Bob-tail rang,

en the bells on Bob tail usually took a fright and ran away.

The set-over pung had its whiffletree and clevis arranged to the horse could walk in one of the team paths, but the sleigh would track with the logging ruts. It was cleverly pondered nd built, but the advantage it had for straight going was a dis-advantage when you tried to turn ut. The horse made out fine but the runners of the sleigh now responded on the bias, and with your horse sensibly trying to get out of the way of two approach-

the problem grains—the grains which have been grown in tremendous surpluses because of guaranteed price supports. But it is obvious from results so far that while Secretary Freeman is achieving some success in reducing the amount of land planted to the problem crops, it

deeply concerned over the cost of the farm price support program. The cost is not being reduced; it is larger than ever. The government has paid out some \$900,000,000 more in farm subsidy payments this year than

deal few peoples have ever-developed in their dogmas. But while humans could ride cold to

straight, and the paradox of this was that little heavy teaming was done on Sundays, but market On market day, after a wary at least \$500,000,000. Markett - 187 178

The fact is the farm price support program is becoming ever more costly despite valiant efforts by Secretaries of Agriculture to trim it down.

Secretary Freeman is paying higher price supports for the crops which are raised under the land-retirement agreement, and he is offering more for the land retired. In return, however, he requires that this be land on which these crops have been the company that the crops have been and post just grown previously, and not just

Taking all these things into consideration, Secretary Freeman figures, on paper, that the gov-ernment would have had to pay out some \$500,000,000 more in orice - supporting crops which would have been grown on this land if it had been planted. Now, in addition to feed grains, Secretary Freeman is taking on wheat, under a similar program. In other words he is paying farmers to take wheat land out of production in return for higher price supports on wheat.

In return corn acreage wa reduced from 71,443,000 acres to 58,275,000. Grain sorghum acreage came down from 15,301,000 acres to 10,901,000.

ting stocks of butter, wheat and other farm proceets are a big problem here in Cam la. But the problem is a comparatively small one as compared to what faces the U.S. Department of Agriculture, as will be seen from the fellowing article.

. . . The White House is reported is costing money to do it, writes Josephine Ripley in the Christian Science Monitor.

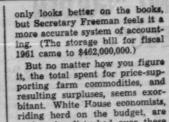

last. In other words, the Freeman program to date is more costly than the Benson program. Not that Secretary Freeman got what he wanted in the way of while humans could ride cold to church, eggs had to be kept warm with blankets and a lantern lit. And while humans could get dumped out, eggs had to ride dumped out, eggs had to be kept warm program. Congress did not give it to him—with the exception of a new deal on feed grains. Most of the farm subsidy increase, however, is due to that

Secretary Freeman admits that the new program accounts for \$768,000,000 of the farm subsidy increase, but claims the program has actually saved the taxpayers Even so, the Budget Burea

has estimated that all federal subsidies for farmers in the current fiscal year, ending June 30, 1962, will total a fat \$4,700,-

any land, as under the old soil bank program.

Under the feed grain program support price for corn was upped from \$1.06 to \$1.20 a bushel. arley went from 77 cents bushel to 93 cents. The support price for rye went from 90 cents a bushel to \$1.02. Oats went from 50 cents a bushel to 62; and grain sorghums from \$1.50 per hundred-weight to \$1.93.

billions being poured into the farm program and hopeful that somehow the figure can be pared Mushrooms Need

a "White Thumb" One business you won't find on every corner is that of raisooms for the whole sale market. It is true Americans have eaten them for many generations, but originally they ate wild mushrooms gather ed in the fields. Mushroom culture started in this country about 1900. The growth has been slow. The ancient Greeks, Egyptians, and Romans knew mushrooms

and regarded them as a delicacy. The Romans called them "food for the gods." But it was not un-til around 1700 that they were produced in any quantity in Europe. Louis XIV at this time encouraged their growing. The French, since then, have been oremost in producing them, us ing caves and quarries around Paris in which to cultivate them. Most American mushroom farmers construct special build-

ing plant. Girls in the plant examine them for imperfections; separate according to size; box; weigh and seal the container.

weigh and seal the container.
They then are placed on the shelves of the retail markets.
The grower of mushrooms needs a "white thumb" instead of a green one. The mushroom does not behave like green plants which elbergh carbon doxide and The prophets reproved Israel for adultery when they forsook God and worshipped idols. This was spiritual adultery. When which absorb carbon dioxide and release waste oxygen. They instead "breathe" oxygen and exhale carbon dioxide. They have no chlorophyll. This lack of green coloring matter makes them white.

The growing houses are dark.
