economy we would refer him to a recent issue of Time which points out that for the first time in history the Nation's Steel production is approaching seven million tons a year. The Nation's Auto Industry got off to their fastest start in five years with the 1963 models. A half-billion bushel wheat crop was not only harvested but partly sold. September unemployment was down to 260,000 — its lowest ebb in three years. Listing these impressive achievements of the Canadian economy, the October 28th issue of Time went on to say that the Canadian Economy was "backing in a prosperous warmth".

As further evidence that the eco-

nomy of Canada is buoyant, let us also remind Sam that the gross National Product has reached an estimated 40 billion which represents a 7 percent growth. With these facts plainly evident for all to see it's no wonder Sam has to resort to such picaresque political barbs as the origin of the car Premier. He is gratifying, however, to hear him admit there has never been such an outstanding member of the Legislature representing Norfolk as the Hon. James N. Allan. Incidentally we learned that Sam's U.S. press failed to function again last week. The parts from South of the Border didn't arrive.

Doc Austin has been casting some pretty dirty slurs in our direction since he returned empty handed from his hunting expedition to the French River area. He has even implied that someone else shot our moose meat for us. After listening to his venomous, we're not surprised at the tactics he is taking. He is even telling the far fetched story that he brought down a fine buck at fifty paces and while he was getting out his hunting knife to finish the job the buck jumped up and took off. If this is true then Doc is obviously subject to 'Buck' fever. Perhaps it is only an overhang from the attack that fills his mind with such strange suspicions concerning the authenticity of the "Bagle" eye's experience. Just plain jealousy we'd call it.

After watching the Russians dispose of the Hamilton Red Wings on Monday night we can better understand the ability of that Nation to

## THE NEW RELIABLES

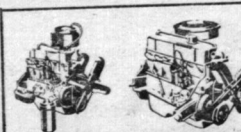

## ONLY CHEVROLET OFFERS THIS PROVEN PAY-OFF IN POWER, PERFORMANCE AND DEPENDABILITY

1963 Chevrolet trucks proved their mettle before they went on sale. To do this, six Chevrolets were taken across the continent for a 2,000 mile shakedown run through some of the wildest terrain in North America — the Baja California peninsula in Mexico.

Chevrolet's power, performance and dependability paid off — the entire run was completed without a breakdown, failure or delay; and with only normal maintenance! That's how '63 Chevrolet trucks got the name "The New Reliabilities".

This proven reliability is built into every '63 Chevrolet truck. Whether you run 'em cross-country or cross-town, '63 Chevs will deliver what they promise!

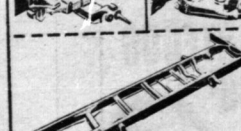

Get the facts today, from your local Chevrolet truck dealer, then you'll know — Chevrolet pays off!

NEW POWER for '63 Chevrolet has two new engines — a 230 cu. in. Six (140 hp) and a 260 cu. in. Six (165 hp). Both are equipped with 7-bearing crankshafts, positive crankcase ventilation, full-flow oil filter and Delco-Remy generators. They're the newest additions to Chevrolet's complete line of proven performance-tested engines.

TWO NEW SUSPENSIONS. Light duty Chevrolets feature independent coil spring front suspension. Standard equipment for Medium and Heavy duty Chevrolets is the new Variable-rate leaf spring front suspension. Based on Chevrolet's renowned variable-rate rear suspension, it provides better tracking and handling with reduced maintenance.

NEW FRAMES. Stronger, more durable ladder-type frames are '63 Chevrolet's backbone. Each frame, in each series, has been specifically engineered and built to meet the toughest load and road conditions. It's Chevrolet's way of making sure that every payload pays off in profits for you!
