

THE EDITOR'S COLUMN

BY G. D. M.
It was a pleasure to read Sam's column last week when he aired his true feelings regarding the new sheriff of Haldimand County. Having read for so many years the verbal abuse heaped upon the old Editor of the Record it was a relief to find that Sam was not truly friendly. We must take exception to one of the phrases used by Sam in the article and that is, "We have been friendly rivals over a long period of years during which he has lambasted us unmercifully with his vitriolic abuse." It is not true that we have been friendly rivals. We have been friendly rivals only in the sense that we have both been in the same business for many years. We have not been friendly rivals in the sense that we have both been in the same business for many years. We have not been friendly rivals in the sense that we have both been in the same business for many years.

Another CO-OP Fertilizer Service
LIQUID NITROGEN for bigger corn yields
For maximum yields, your corn requires Supplemental Nitrogen—that is, fertilizer nitrogen applied direct to the soil in addition to that supplied by your mixed fertilizer. CO-OP Aqua Ammonia 20% Nitrogen gets to the "root" of your corn fertilization problem. Injected below the soil surface, it goes to work quickly and safely in all weather conditions. Your crops receive an immediate "shot-in-the-arm" that ensures higher yields and greater profits. You don't have to invest in time or equipment, your Co-operative will handle the complete operation for you!

it started 90 years ago...
90 years ago this fall, Canada's first commercial telephones were installed in Ottawa. Canada's second Prime Minister, The Hon. Alexander Mackenzie (who was also Minister of Public Works) had one set installed in the Public Works Department; the other was at Rideau Hall, residence of the Earl of Dufferin, the Governor General. These phones were used for government business and for musical concerts to demonstrate the miracle of the telephone to guests at Rideau Hall.
And from that beginning grew Bell Canada! Today, there is probably not a single person in Quebec or Ontario who does not, in one way or another, "use the services we provide."
Radio and TV programs are relayed through our microwave network; business communications by voice or teletype, or transmitted through our facilities; so too newspapers and the government, police and fire departments; there are 4½ million Bell Canada phones in homes and offices, and thousands of public phones. Like Canada, we of Bell Canada have come a long way. And one more point: we're proud that nearly 95% of our shares are owned by Canadian residents.
