HE LOOKS AFTER YOUR INTERESTS AND GETS THINGS DONE

He is the Senior Member of the ROBARTS GOVERNMENT that has directed the great economic progress of the Province of Ontario

VOTE WITH CONFIDENCE - BUT BE SURE AND VOTE!

Re-Elect ALLAN

THE EDITOR'S COLUMN

The cold weather that we have endured the past week makes us wonder whether or not we will have any Fall this year.

Temperatures fell to record lows and mixed with rain made life pretty miserable. The common cold germ certainly thrives in this kind of weather as can be seen by the number of persons suffering from

the miseries inflicted by it. For all the complaining that we do, this area of the world seems to fare better than many parts of this continent. We are not troubled by earth quakes, hurricanes or tornadoes which ruin the lives of many people. As we reflect, a little cold weather and rain is not really all that bad.

Understand that the County of Haldimand is planning to erect a new administrative office building in the Town of Cayuga in the very near future. A building of this nature will be a real asset to the county, and will alleviate much of the congestion in the County Court House. At the present time, the County Health Unit, the Emergency Measures Organization, and the County Engineer, to mention but a few, all maintain offices in the Court House, which creates a great deal of congestion. To provide a new Administrative Building is a step in the right direction.

We were disturbed to hear that one of the tentative sites chosen for the new building would entail cutting down a number of the old and stately Oak trees which now adorn the Court House Park. Haldimand is a beautiful setting for its Court House. The trees surrounding the Court House lend majesty and an air of strength and stability to the principles that are upheld within its confines. To cut any of the trees

would ruin the present setting. Miss Gladys Widdon, who is a missionary to the Seminole Indians in Florida, was the guest speaker. She read Eph 6:10-20. She said that the Lord must do the work and she asked the members to pray for her spiritual needs and also displayed an Indian doll with colorful costume such as the Indian women wear, also some handwork with intricate patterns made by them. The members spent a most enjoyable evening and all wishing her God-speed and a fruitful ministry.

HIGHWAY DEPARTMENT ANSWERS ENQUIRIES

In view of the many inquiries received from the public pertaining to highways and roads under construction during the summer months, the Honourable George E. Goma, Minister of Highways, has released the following statement for publication.

Due to climatic conditions in the Province of Ontario, the months of May, June, July, August, September and October are the only months of the year in which an extensive construction program can be carried out.

For economical and practical reasons, work is of necessity confined to this period of the year when all areas of construction are free from the effects of frost. In order to ensure proper compaction in grading operations and to obtain the full benefit of the materials used, most construction must be done under the best of weather conditions.

Keeping in mind that time is of the essence, the Department of Highways has a system of contract control designed to expedite the processing of contracts and to eliminate costly and time consuming practices. The system calls for the pre-qualification of contractors, the qualification of tenders weekly and the proven capacity of the contractor to do the work.

It is unfortunate that this construction period conflicts with Ontario's ever growing tourist season but with the operation of our visitors we are increasing our total provincial highway mileage each year, providing wide and safe roads upon which the many vehicles of trade and tourism may travel.

Crusaders and Young People THOUGHT: Life with Christ is an endless hope; without Him it is a hopeless end!

6-H NOTES

The first meeting of the Jarvis III 6-H Group was held at Mrs. Orvil Walker's home on September 30th at 1:30. Shirley Taylor presided. The meeting opened with the election of officers by the group. President—Marilyn Slater; Vice-President—Carol Reynolds; Secretary—Alice Taylor; Treasurer—Mary Lou Bousfield; Public Relations—June Awde. We chose the Jarvis 6-H Prech-makers as the name for our group. Mrs. Walker served doughnuts and refreshments. The next meeting will be on October 14, at 1:30 at Mrs. Walker's home.

Prof Tom Lane of the G.A.C. Soil's Department calculates that the manure from 60,000 laying hens has a value equivalent to \$20,000.00 worth of commercial fertilizer. Our project this fall is "Accessories". We discussed better color and what could be worn with them. Shirley Slater went over the Member's pamphlet with us.

If you're looking for a place to start on home improvements, consider these facts about electric wiring.

To most people, home improvements mean a paneled recreation room or a shiny new set of kitchen cupboards. But there's a way to improve the home: modernize your home wiring first. Up-to-date wiring lets you make the most of the new room you're building, or the old one you're re-styling. It lets you place your lighting wherever you like, have any electrical outlets as you choose, and use as many appliances as you need without popping fuses. In fact, you'll notice pleasant changes all through your home. Modern wiring can improve the efficiency of your lighting and the performance of your appliances. It puts such comforts as electric heating and air conditioning well within your reach. It can also make a big difference to the safety and re-sale value of your home. Before you reach for your toolbox, reach for your telephone. Call a qualified electrical contractor, or your Hydro.

Up-to-date wiring costs less than you may think. Yet it could be your most important home improvement of all.

er field that is designated to be plowed. If this older field is given a chance to grow during August, it may supply much of the roughage required by the herd in September. In some cases, it may be necessary to supplement this with silage while the alfalfa is "on vacation".

In early September, top-dress the alfalfa with manure or commercial fertilizer. If it is necessary to pasture the field in October, don't do it in excess; leave 4 or 5 inches of stubble for winter protection.

Most alfalfa stands have to be reseeded after three or four years. By wisely using a will-resistant variety like Vermont Saranac, stands could last longer.

Haldimand 6-H members are to be congratulated on the excellent work done on gate signs for farm entrances. The signs were put forth by the many members in the county has done much to make farm entrances very attractive.

A ton of pasture in September may cost you three tons alfalfa next year, warns Crop Specialist Dr. B. E. Twamley, Ontario Agricultural College, Guelph.

Alfalfa doesn't send food to its roots until its shoots have enough food for their use. If the leaves are grazed or harvested in the fall before food has been sent to the crown buds and roots, the crown will have enough energy to shoot through the earth next spring. Give the field a complete rest in late summer and early fall. In central Ontario, let your pasture take a vacation from September 1 to October 10. During this period, use an old-
