

## THE EDITOR'S LOCAL ITEMS COLUMN

It never ceases to amaze us how small this world really is. We can only conclude that it must be the modern means of transportation available to us that make it possible for so many people in this day and age. You can fly to Vancouver in 5 hours or if you have more time you can take the train and be in the same city in three days and four nights. If you have the patience you can leave Toronto on Friday night and arrive on a quiet secluded lake, surrounded by nature, in three hours. Patience is a necessary virtue if you intend to make this trip often because the abundance of cars on the highways make it a trying journey but well worth it once you have reached your destination.

The world is small and is highlighted by the fact that really no matter where you go or stay, or who you meet for the first time there is one or more acquaintances that you know mutually. For instance this summer we rented a summer cottage and we found to our amazement that the land lady's daughter attended Wesleyan with Diana, my sister. Last night a friend of the chap who we are renting the cottage with dropped in for a visit and we found that he is a nephew of Calvin Joneson. Meeting different people is always an exciting experience and the experience is made more enjoyable by the fact that we know the same people.

Speaking of cottages it is necessary to speak about the weather, and the weather, this summer must be setting a record. It seems that spring and summer have reversed their places this year in that the weather thus far in July would be called a good spring. We haven't seen anywhere as to what has caused this reversal but we can imagine that it will be some time before the sun and the moon will be in the right place to launch the summer.
