

Cutworm Control Week Apply DDT Now

The week of April 14 has been designated by the Delhi Research Station staff as the correct time to apply the first application of DDT to the cover crop for the control of cutworms in tobacco soil.

This forecast service is part of the split DDT application program which was recommended last year for the first time.

The bulletin is based on observations that cutworm eggs were hatching in tobacco fields last week.

The object of the early DDT application to the cover crop is to poison as many of the cutworms as possible while they are still small and susceptible to the treatment.

Some species of the cutworm have developed an immunity to most sprays and are almost impossible to destroy as they near adulthood.

The bulletin's instructions read as follows: "A split application of DDT to the cover crop before plowing and to the soil surface before planting is necessary to obtain the maximum degree of cutworm control."

"Treatment of the rye or wheat cover crop with DDT for cutworm control should be applied DURING THE WEEK OF APRIL 14TH. This treatment will be effective only after the cutworms have been allowed time to feed on the treated cover crop. ALLOW AT LEAST 5 DAYS BETWEEN TREATMENT AND PLOWING. Treat bordering areas of rye or wheat fields as well as fence rows at the same time.

A rate of 1/2 GAL. PER ACRE OF DDT 25% EMULSIBLE CONCENTRATE should be used. To obtain good coverage with ground equipment use 15 to 30 GAL. of water per acre.

A second DDT treatment should be applied to the soil at least 5 days before planting at the rate of 1 2/3 GAL. per acre of DDT 25% emulsible concentrate. Leave the DDT on the soil surface.

Volunteers perform more than 90 per cent of the work done by the Canadian Red Cross Society.

Norfolk General Offers Bursaries

Prospective nurses can receive financial assistance under the Norfolk General Hospital, Simcoe, nursing bursary program, announced George Pleasance, chairman of the bursary committee in a press release.

The Bursaries are awarded through the understanding that the Nursing at the hospital.

A Bursary is for \$525.00 and paid semi-annually for three instalments of \$175.00 per year, except to students training in hospitals where the third year is internship, or a two year program, in which cases the bursary will be for \$350.00 and paid \$175.00 a year for two years.

Application is made through the Director of recipient will return to Norfolk General Hospital for at least one year after graduation, at which time she would be paid the regular rate of pay.

The students should be accepted for training in any approved school in Ontario which leads following examination to the title of Registered Nurse.

Bullets And Water Do Not Mix

Beware the .22 bullet fired into water. It may wander off in an entirely different direction - and with most of its original bite.

When Winchester ballistics experts fired .22 Super-X bullets at a water surface, the ricocheting bullets lost practically none of their velocity. The bullets hit the water at about 1,240 feet per second and ricocheted at 1,195 feet per second - a velocity loss of only 45 feet per second.

Whipped gelatin dishes freeze well. Molded salad may be frozen satisfactorily if 1 1/2 cups of liquid are used instead of two cups. This prevents or reduces "weeping" of the gelatin on thawing. Store in freezer less than one month, in a salad pan covered tightly with self-sealing plastic wrap and placed in a food storage clear plastic bag.

Fertilizers Regulations

OTTAWA - Regulations governing registrations of fertilizers. In the past, all fertilizers except customer-formula and single ingredient fertilizers had to be registered. Henceforth, registration will be required only for fertilizer-pesticide mixtures. Also, under the new regulations the period of registration has been extended to five years from one year.

The revised regulations were approved recently and have gone into effect.

The changes include an updating of the registration and labelling sections to keep abreast of current manufacturing and marketing practices. The standards have also been changed to provide a means of assessing the total nutrient content of a fertilizer rather than an individual assessment of each nutrient. The changes in the standards at the same time safeguard farmers against any sacrifice of essential agronomic quality.

Among the changes is an easing of the regulation

Farmers using customer-formula fertilizers will benefit from the changes. It is now necessary for labels on these fertilizers to contain a guarantee of plant nutrient contents.

Fertilizer firms and farmers may obtain full details of the changes from the Plant Products Division, Canada Department of Agriculture, Ottawa.

Local Fans In For Treat

Caledonia Corvairs ran into a tough and hard-hitting crew from the north on the weekend as they dropped the first two games of OHA

Junior D finals to the Bobcaygeon Ticats, 6-1, on Friday night and 4-2 Saturday night before almost 2,000 fans.

On Friday, Mat Kimble scored a pair and singles went to Sterling Bowins, Randy Masales, Bob Kimble and Dave Catwell for Bobcaygeon. Tom Young got the only Caledonia goal as the Corvairs were outshot 45 to 26.

It was different story on Saturday night as the Corvairs played a much better game and with a bit of luck could have come out the victors.

Bob Moerschfelder scored the only goal of the first period when he hit on a Caledonia power play at 12.40.

Students End Year

Dr. J. A. Colvin, President, of Fanshawe College brought greetings from the parent college in London.

He told the dinner guests that the Norfolk Agricultural School was made possible by local efforts and the desire to make Fanshawe a community college rather than just a London institution.

Guest speaker for the evening was William Knowles, MP for Norfolk-Haldimand. Mr. Knowles congratulated the students for their mature attitude and expressed his pleasure at the way they had advanced in the course.

The term end is the half-way mark for the eleven students in the two year Farm Business Management Diploma Course. The second term will begin about October 15 when it is expected the student enrolment will be enlarged by another group of first year students.

To this end, Harry B. Barrett, co-ordinator of the Norfolk Agricultural School will be arranging a number of personal interviews with people who express an interest in the course.

Referring to the industrial complex under development at Nanticoke and the proposed steel plant in the Port Burwell area, Mr. Knowles said, "Norfolk County stands between the jaws of a huge nut cracker."

He forecast the villages and towns will become flooded with industrial workers and much of the farm land will be used for other purposes in the future.

The changes which will likely come about may cause new courses related to industrial technology to be introduced by Fanshawe College as they are required, he suggested.

David Norman, president of the student's council at the Norfolk Agricultural School, presided as chairman for the banquet, while other

you spread the bread to the edges with butter or margarine to prevent the fillings from making it soggy.

SIMCOE - Fanshawe College students at the Norfolk Agricultural School wound up their first year on Friday evening with a banquet, here at the Junior Farmer building. Approximately 100 people attended.

On hand were college officials, instructors, people who had aided by participating in some phase of the course, and friends and relatives of the students.
