Opportunity To Build

The Ontario General Farm Organization Campaign Committee considered that the enabling legislation to provide for a GFO gives Ontario farmers every opportunity to build and operate their own organization, consistent with minimum controls to safeguard all farmers.

This was the gist of a statement made by Chairman Malcolm Davidson in Toronto on May 8, following a meeting of the campaign committee.

The legislation in essence gives to the founding convention the power to establish the fact that checkoff money collected by marketing boards and associations must be forwarded to the GFO. It also established the maximum which that may be collected.

If the vote succeeds, the legislation provides for an interim management committee which will be allowed to do three specific

things: conduct elections of delegates; conduct election of Provincial Council directors; and hold the first annual convention.

The committee suggested that no member of the interim committee should be eligible for election to the executive of the GFO at the founding convention, and that all members of the interim committee should be farmers.

Until the founding convention all Ontario farmers will be members of the GFO, and will elect three delegates per 1000 farmers on the basis of the 1966 census.

The Campaign Committee foresees a real danger that should farmers fail to get together through a GFO, they will be driven from their farms by thousands.

To achieve equal recognition with other segments of society, farmers must make maximum use of marketing legislation and the legislation on a GFO which is now before the Ontario

"Farmers must work together," Mr. Davidson said, "using all available help to maintain an industry of independent businessmen who also recognize that some collective action is essential for their individual survival. The situation in agriculture is just that serious."

The need for a single strong general farm organization in Ontario was sparked by the report of the Special Committee on Farm Income which suggested, among other things, that some farmers might be better off if they left the farm.

The GFO Campaign Committee is pressing for a strong general farm organization but the committee neither approves nor disapproves of other parts of the report.

Indeed, the Campaign Committee believes that a new GFO should give priority to study of the report to determine which parts it can approve and which parts it must reject in the best interests of farmers, he said.

System Approach

A systems approach to would load the shredded garbage disposal on a regional scale could eliminate the use of dumps.

Such a system was outlined at a meeting of the Haldimand Zone of the Niagara Regional Development Council in Caledonia last week.

Gordon L. Sutin and Mr. Frank Ferguson, National Regional Development Council (N.R.D.C.), Consultants, outlined a plan for Haldimand County.

They said Haldimand County Garbage Disposal needs could probably be met by one shredding machine generated by the incinerator. Mr. Sutin said this would be aided by mechanical

You already know where most prices are going. Up. So you'd naturally expect the brand-new '69 cars shown here to cost a lot more than last year. Fact is, many cars in this year's line-up from Chevrolet cost less, much less, than last year's models. For instance, the 2-door Impala, equipped with power disc brakes, Turbo Hydra-matic transmission, whitewalls, wheel covers and head restraints, plus a bigger motor than last year, is yours for \$120.50* less than last year's figure. And comparable savings are waiting for you on many Nova, Chevelle and Camaro models. In other words, you can buy many of this year's cars at less than last year's prices. Which is what putting you first is all about. From the top, Chevy Nova, Chevelle Malibu, Camaro and Impala.
