

All cooling systems **GO!**

1 Imperial Gallon \$2.99  
1 Imperial Qt. .... 84c

**Keep it under your hood... it's good, till 1971!**

Meet Perma-Fill, uncontested sub-zero hero of the cold war. No upstart this — the tested and proven favourite of many a happy motorist. Protects even in 62° below temperatures. But Perma-Fill is more than just an anti-freeze; it seals your car's cooling system too! The built-in sealant may even save you the price of a new radiator.

And that's not all; come summer, our cold-crusher becomes a super-coolant (330° boiling point). Fights the freeze and beats the heat for 2 full years. Fights the rising price war too! Perma-Fill is the same price as last year despite a general increase of 15c to 25c a gallon. Chromate-compatible formula for all cars, including those with aluminum blocks.
