

Not all of the 768 acres at Nanticoke's hydro site is being developed. On the east side of the 655-foot stack there is room to double the size of the 2,000,000 kilowatt plant. If the plant is extended to its maximum size it will be 910 feet long and 275 wide or three football fields long and one football field wide. The station will house four giant generators that will have capacity roughly equal to Canada's share of the power resources at Niagara Falls. (Staff Photo)

### Smother Corn With Butter

**CORN ON THE COB**  
Smothered in butter and salt and right on the cob is the way most of us like fresh Ontario sweet corn. These "on-the-cob" variations from the Food Department, MacDonald Institute, University of Guelph, are traditional family favorites. The recipes are simple and tasty and especially suited to those end-of-season barbecues.
