

Kinsmen Club Of Hagersville

"There is no wayway in Canada than as most polluted," said Wm. Cheetham. "The problem lies with the degree of pollution." There is, of course, some natural pollution caused by the run-off of some leaching substances from the soil - essentially a self-cleaning process. It appears that man's wastes dumped into our rivers and lakes lead to increased algae growth to stain the oxygen content as well as spoiling the appearance of our fresh water sources.

Only in the past few years have the news media concentrated on creating an awareness of our worsening pollution - a situation that will not be overcome until each individual makes a personal commitment to combat the problem. It is scarcely enough to ask: "What can I do?" while one continues to desecrate his environment through carelessness or even ignorance. No headway can be made to correction of the situation, much less keep up with it, until we change our habits and become more responsible to others, ourselves, and generations to come.

Mr. Cheetham, Public Relations Director for the Ontario Water Resources Commission, was the guest speaker at a recent meeting of the Kinsmen Club. He commended the members for accepting the challenge of attempting a grass roots education program for pollution control in the community and beyond.

The OWR/C was created specifically in 1956 to alleviate the problem and is responsible for the development, utilization, treatment, and management of water resources, including the provision of adequate pollution control measures throughout the province.

Through its eight divisions, the Commission has made some strides

Sandusk

Sandusk WI met at the home of Mrs. Leo Mulkins on Thursday evening for their Christmas meeting.

Mr. and Mrs. Oswald Werner were dinner guests of Mr. and Mrs. Craig Werner on Saturday.

Mr. and Mrs. Wm. Nicol visited Mrs. Pearl Scarle at Grandview Lodge last Sunday.

A quiet wedding took place on Saturday at 3 o'clock in Chesapeake United Church, when Mrs. Ruby Burnside, (youngest daughter of Mr. and Mrs. Wm. Bray) was united in marriage with Mr. Stanley Gacek of Hamilton.

forward. Municipalities have impressed filtration plants for treatment of sewage and industry is being increasingly pressured to clean up their disposal practices. Through increased sanitary supervision, laboratory control, and research, new means of treatment and disposal are being developed and put into use.

Mr. Ross Stone, of the Hagersville Council, stated that, in his opinion, the waste disposal unit in this community is presently doing the job for which it was designed. He expressed council's concern that, because of our sewers being laid in the rockbed beneath the town, infiltration in the spring by heavy run-off of melting snows presents a

problem that is temporarily incapable of being handled each year. No easy solution to this problem is immediately apparent.

When asked how the club could contribute positively to the pollution situation, Mr. Cheetham suggested three basic ways:

1. Education of the public, especially at the

younger age level, through films, pamphlets, class discussion, and questioning their parents about their attitudes. "Children will follow the example set by their elders," he said.

2. Practice what we preach by encouraging the use of such items as phosphate-free detergents (which by itself will not

eradicate the problem) and careful disposal of non-returnable bottles.

Dollars And Good Sense

by William J. Martin

Year Mr. Martin: We've all heard that these days a college education is needed for almost any good job, but is it really? Our population is growing and conscious of the need to eliminate it from our graduates from high school to quite an extent. Should he attend college? Frankly, our budget just couldn't stand the high cost of a college education. Please give us your advice.

Dear B. M.: It's true that a college education is necessary for many fields of employment and job opportunities will continue to increase fastest in occupations requiring the most education.

Experts estimate that the number of professional and executive positions in the service-producing industries, he growing they say that a high school education will be sufficient for eight out of every ten jobs!

Although there is a strong demand for qualified auto mechanics, jobs for high school graduates are not restricted to the so-called blue-collar jobs. There will be a big demand for computer operators, systems analysts, recreation workers, office machine operators and business machine service men, for instance.

By 1975 there will be a rapid growth in such high-tech jobs, especially in the computer and sales sectors. This growth reflects a continued demand for people who can perform jobs in education and health services, and a continuing growth in the number of paperwork required in all types of

The decision of a college location is up to you and our society of course. There are many state supported colleges where tuition is free or nominal, but growing enrollment standards up very high.

An outlook of more than 30 professions and 300 occupations is contained in the U.S. Bureau of Labor Statistics 1970-71 edition of "Occupational Outlook Handbook." It's available from the Government Printing Office in Washington, D.C., 20402 for \$6.00.

The Anglican Church Women met at the home of Mrs. Isobel Sumner on Wed. Dec. 2.

There was a pot luck luncheon, followed by the business meeting. Isobel had her recreation room decorated for Christmas and had a huge table tastefully set up to serve the luncheon.

Mrs. Ewing asked the blessing. After the meal Mrs. Sumner thanked the ladies for contributing food for the delicious meal.

They then proceeded to another room (still downstairs) where we held our meeting. The meeting opened with the President Mrs. Isobel Sumner in the chair. An Advent Prayer was read from the bulletin by the president. The ACW and Lord's Prayer were repeated in unison. The scripture reading St. Matthew 21 Chapter: Christ enters Jerusalem, cleanses the Temple and rebukes the Priests and Elders by the parable of the Wicked husbandman.

The secretary's report was given by Mrs. Adah Parsons, and approved as read. Mrs. Ina Dyer gave the treasurer's report. Mrs. Elsie Reece gave the social services report. A card sent to Mrs. Wrightson, who is temporarily indisposed. It was decided to make up seven shut-in's baskets for Christmas.

It was decided that the ACW contribute to the Sunday School Christmas party.

Business: "Operation Eye glasses," for the students of the Carribean Commonwealth; be put in the hands of Mrs. Adah Parsons. In due course they will be sent to Hamilton, and forwarded from there and also we maintain our present commitment to the Primate's World Relief Fund.

Mrs. Reece suggested we have an evening meeting in the near future and ask Miss Mary Murdock to show the films and slides she took while in Britain last summer.

The president read some interesting facts from the bulletin: Copies of "Diocesan Project Book," which have been forwarded to group presidents for study; projects they would like to see supported by their parishes. Last week at their parishes. Last week at the National Board Meeting in Granby Quebec, this fact was revealed by Rev. W. E. Lowe: The break-down of the 1969 Canadian Anglican Collections of \$32,699,861

Cayuga ACW

The Jarvis Record, Thursday, December 10, 1970 - 21

was 83c to the parish, 10c to the Diocese and seven cents to the national projects and overseas. He said, "We have to ask ourselves whether this is good enough." To quote Bishop Bagnell, "So many see the first task of the church in terms of survival, that they miss the greater

opportunity for sacrifice and service which is in fact our only hope as we share in his works for love for all men."

Mrs. Ewing occupied the chair for the election of officers for next year. The end result was the same slate of officers were reelected. Putting it another

way, they did such a good job, they were stuck with the same officer for another year. The officers are as follows, President Mrs. Isobel Sumner, Secretary Mrs. Adah Parsons, Treasurer Mrs. Ina Dyer, with Mrs. Grace Parsons and Mrs. Donna Armstrong as auditors.

Mrs. Reece thanked the hostess for having us to her beautiful home.

The next meeting will be at the home of Mrs. Adah Parsons, Jan. 6, 1971 at 2:30 pm. Lunch Committee, Mrs. Elsie Reece and Mrs. Ann Sutor. The meeting closed with prayer by the president.
