Doug Galbraith, managing editor of The Record receives second place award for the most improved paper in 1969 from H. D. McConnell, president of the Ontario Weekly Newspaper Association.

The Record Wins Second

The Record is back into its winning ways.

We take pride in announcing that we placed second in Ontario for the most improved weekly newspaper in 1969.

The Record in the past under the management of the late A. L. Miller who took so many prizes in the weekly newspaper competitions he was finally given the cup to keep.

We at the Record want you to have such a high quality product we intend to strive to carry on the tradition of winning.

Vol. 92 No. 7 Jarvis, Ontario, Thursday, February 19, 1970 10c a copy

Hydro Station To Double Its Size

PORT DOVER - Work has started on the second stage of Ontario Hydro's Nanticoke generating station on Lake Erie, eight miles east of here.

Ontario Hydro Chairman George Gathercole said, "Orders will be placed shortly for turbine generators and ancillary equipment to raise the capacity of the station by 2,000,000 kilowatts."

As originally envisioned in 1966, when construction of the station was announced, Nanticoke will have a capacity of 4,000,000 kilowatts, said Mr. Gathercole. Site work began in 1967 on stage one.

The eight units at Nanticoke will be completed in 1978. First power from the station is expected in 1971 and every year afterwards, one 500,000-kilowatt unit will

be progressively brought on the line.

"Nanticoke is to be coal-fired", said Mr. Gathercole. "This is consistent with Ontario Hydro's policy of maintaining an economical mix of hydro-electric, conventional thermal and nuclear generation."

Total investment in the plant is estimated at more than \$600 million in terms of today's costs.

The extension will be a duplication of the present station. The currently planned administration building will serve the whole plant.

The Nanticoke addition will be built to the west of the present station on the 768-acre Lake Erie site. No additional land will be required.

Consistent with the Commission's policy of

installing the best possible pollution abatement equipment, the addition will incorporate similar equipment and procedures planned for the original station.

A second 655-foot, multi-flued chimney, unique in North America, will serve the four new units. Electrostatic precipitators will remove 99.5 per cent of fly ash particles from flue gases before they enter the chimney.

Provision has also been made in the layout and design of the station for installation of additional equipment when it becomes available to remove impurities from stack gases. On the site itself, space has been left close to the plant for equipment installation.

At the peak of construction, the work force is expected to be 1,500, the same as for the original station, although the peak will last longer.

17th Annual Lions Minstrel Show

All roads lead to Jarvis for the annual Lions Club minstrel show.

The best one of all is promised when the curtain opens at 8:15 p.m. Feb. 26 for the seventeenth annual show sponsored by the club.

Thursday night is family night when children of public school age will be admitted for half of the adult price.

Ted Montague is director for the show and Mrs. Margaret Miller, musical director. The show will be playing at the Jarvis Community Centre Feb. 26, 27 and 28.

Seven Industries In Offing

Seven more industries will settle on the north shore of Lake Erie.

This was disclosed Monday by Dr. James A. Vance former chairman of the Ontario Water Resources Commission who was speaking to the Woodstock Rotary Club.

These will be other than Stelco, Ontario Hydro and Texaco of Canada Ltd. that

have already been announced, he said.

Dr. Vance said there are signs that Western Ontario will soon be making greater use of Great Lakes shipping.

He would not elaborate on what other industrial developments are in the offing.

Ontario development has been centred in the Toronto Hamilton Area, but will

now extend to the upper shore of Lake Erie and Lake Huron, he predicted.

Members of the Great Lakes commission, who include representatives of eight states in United States, have been talking about the potential of the north shore, he said.

Dr. Vance said iron ore was sparking development around Lake Erie. Industries are settling where there is ample water supply.

"I don't think we realize the importance of the Great Lakes", Dr. Vance said, "History is just repeating itself."

This is seen with the building of ships some of which will probably never move out of the upper lake area.

One 1,000-foot-long ship is being built by Bethlehem Steel for carrying iron ore on the lakes, he said.

Hagersville To Hold Payment

HAGERSVILLE - Council will hold back the third progress payment for the modification construction of its sewer plant, it was decided last week.

Clerk A. A. Roth said it hasn't been determined why the new digester for the plant in the \$30,000 improvement of the plant isn't operating properly.

"It could be the extreme cold weather we have

experienced for the last 40 days or it could be for other reasons", he said.

Council wants a meeting with the plant's construction engineer, Sid Dutton, before making the progress payment.

Mr. Dutton will be asked to attend council meeting on Feb. 23 for a conference.

In other business council decided to seek more information on the possibility of the Big Creek Conservation Authority and the Otter Creek Conservation Authority amalgamating.

It was learned that the Haldimand County Board of Education will ask for its education levy payments on a quarterly basis.

The first payment will be due March 31, the second June 30, the third Sept. 30 and the last Dec. 15.

Interest will be charged at the current chartered bank rate on any part of the levy not paid on the due dates.

Clerk Roth reported that the total assessment for the village according to a

Rezoning Approved In Principle

Texaco's application for a zoning change to pave the way for a refinery northeast of Nanticoke has been approved in principle by the Walpole council and planning board.

Chairman Ken Gowan, of the Walpole Planning Board told The Record, that amendments will now be drawn up by the townships planner for the rezoning

When the amendments are complete they will have to be confirmed by both the planning board and the municipal council of Walpole, he said.

From there they will have to be approved by the Ontario Department of Municipal Affairs.
