NOTICE To Snowmobile Operaters

It has been brought to the attention of the village council that certain snowmobiles are being operated within the village without due regard to property lines and at hours when unnecessary noise can only be regarded as unofficially creating a disturbance, should such practices continue the council will take immediate steps to restrict the operation of snowmobiles within the village.

OPP Report

Good visibility is an important factor in the proper operation of a motor vehicle. January weather is changing weather and you may find yourself driving in snow, sleet or rain. The Ontario Department of Transport reminds you that headlights are required from one-half hour after sunset to one-half hour before sunrise and at ANYTIME when visibility prevents you from seeing clearly, persons and vehicles at least 500 feet away. Also, be a wise driver in daylight hours. When visibility is poor, always turn on your headlights — low beam. Remember, you can't avoid a collision if you can't see the hazards.

Officers of the Cayuga Detachment investigated a total of seven motor vehicle accidents over the period of January 4-10, 1970. No injuries sustained as a result of these collisions.

Officers patrolled a total of 6,965 miles, issued 20 warnings and 13 charges to motorists. Ten convictions were registered in Provincial Judges Court on January 7, 1970.

General occurrences investigated were 1 theft, 2 break and enters, 5 other Criminal Code offences, 13 requests for assistance and 1 Liquor Control Act investigation resulting in a charge being laid.

Prov. Const. R. Adams recovered an auto on January 10, 1970, in Oneida Township, which was reported stolen from Brantford, Ontario.

Prov. Const. K. Gammon investigated a hunting accident on January 4, 1970, on the Six Nations Indian REserve resulting in one man receiving gun shot wounds to the leg.

Know Your Snowmobile

The snowmobile is not a toy. The hundreds of park rangers, lumbermen and ranchers who use them for basic transportation can attest to that. But it is essentially a recreational vehicle and as such is subject to a certain amount of abuse and neglect. Unfortunately, abuse and neglect can lead to breakdown on the trail. And a breakdown on the trail in freezing weather and miles from aid can be a serious problem.

Snowmobilers are urged to ride with a reasonable amount of caution; to leave the spectacular aerial leaps and open-throttle full-tilt charges to race drivers. The majority of snowmobile operating disorders stem not from mechanical failures but from abuse and misuse of the vehicle.

Snowmobile users are also urged to learn how their engines work. The time to check the owner's manual is not after a breakdown has occured but before the vehicle goes out on its first long trip. Fortunately, snowmobile engines are generally quite elemental in design and construction and can be easily repaired with a screwdriver, pliers and adjustable wrench.
