

Girl Guide Camporee

On the weekend of June 19, the Girl Guides of Haldimand held their Camporee. On the windy shores of Lake Erie, near Dunnville, some 150 Girl Guides and Rangers camped out to learn about the wonders of nature, which Baden-Powell so wanted the children to enjoy.

Individual campsites were the concern of the local leaders with Mrs. K. Johnston of Blackheath, camp adviser for Haldimand in charge of the total scene. In this manner, the patrol system is used to good advantage.

Saturday afternoon, Mrs. R. Vick of Cayuga, international adviser for Haldimand, told the girls about Guiding in Sweden, then taught them how to make Swedish paper birds, so everyone had a very pretty souvenir to take home with them.

After supper, Mrs. Vick had all the girls make a pinata from a paper bag, paints, construction paper and lots of imagination. Pinatas in Mexico are made of papier mache and at children's parties, each child is blindfolded in turn and is given three tries to break the pinata with a stick. The pinata holds treats for the youngsters.

A giant campfire was held for everyone at camp Saturday evening. Each Company of girls led the rest of the campers in a song. Again there was an international flavour with

an Australian and Hawaiian song, one about Our Chalet and one of the four World Centers of Guiding, as well as a sprinkling of rounds and funny echo songs.

Sunday morning at 10 a.m., everyone marched around the flag pole and formed a giant horse shoe. After Hagersville Rangers, Carolyn Hewitt, Dale Hodgson and Wendy Kramer raised the Canadian flag, the national anthem was sung. Miss Pat Petracca of Hagersville, Commissioner for Haldimand, led the girls in a Guide's Own Service, which does not try to replace a religious service, but emphasizes the common spiritual ground shared by all Guides and Rangers.

Following the service, the girls worked hard to take all the canvases down before the rains came. Through camping and the patrol system, the girls work together with the older and more experienced campers helping the others, and teaching them the whys and hows of tent care, care of the bedroll and outdoor cooking.

Local leaders who camped with the Jarvis girls at Camp Kienuka included Mrs. John Brintnell, District Commissioner; Mrs. Mac Dosser, Guide Captain; Mrs. Oscar Phillips, Lieutenant; and Mrs. Barbara Thompson, leader of the newly formed Ranger Group.

On The Farm Front

In case you meet them, the names of the alfalfa weevil parasites released are: Bathyplectes

Jarvis And District Community Chest Fund

The citizens of Jarvis and Community have once again demonstrated their willingness to share their blessings with those who are less fortunate. Once again the Jarvis and District Community Chest Fund has been oversubscribed. With an objective of \$2500.00 the good people of this community contributed to a final total of \$2898.80. Through the 10 charities whose work we chose to promote, many handicapped will receive assistance and relief, thanks to the generosity of the people of our area.

However, these things do not just happen, but only through the efforts of many willing and concerned officers and canvassers, who gave generously of their time and talents that everyone might be given an opportunity to contribute.

It is my duty, and a privilege as well to express, not only my personal thanks to the executive, campaign managers and a host of canvassers for their support and co-operation, but the appreciation also of every citizen of our community.

curculiones, Tetrastichus incertus, and Microctonus aethiops. About 200 of each were released in two

different Haldimand locations as well as in other counties along Lake Erie.

In other experimental work on alfalfa weevil control, Howard Henry of the Soils and Crops Branch in co-operation with the University of Guelph, has reported excellent results with chemicals.

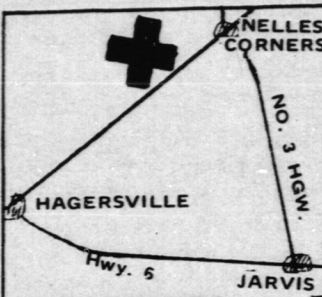

Everyone is invited to the farm of L. B. Mehlenbacher and Son, Kohler, on Thursday evening, July 2, starting at 8 p.m. to see the plots. Seeing is believing, but Dr. Freeman McEwen of the Zoology Department, Guelph, will be along to provide further information.

Local arrangements are now complete for the Provincial Drainage Field Day at Ruigrok Bros., farm, Canboro, on Wednesday, July 15. The morning

program starting at 10 a.m. will be of special interest to drainage contractors who will want to see demonstrations of equipment.

The afternoon program and demonstrations will be presented especially for the farm public. A large turnout from Haldimand is expected. Those uncertain about the location might follow the signs from Highway 3 at Canboro.

The College of Agricultural Technology at Ridgeway is holding a special open house for prospective students and their parents on the afternoon of July 14. Staff of the college will be prepared to answer the questions on the minds of those thinking about a course in agriculture.

Easy Strawberry Jam

Fresh Ontario strawberries make luscious jam. "But," you say, "who wants all the work of cooking over a hot stove?" If you don't then try this recipe, given by food specialists at the MacDonald Institute, University of Guelph, for an uncooked strawberry jam.

Uncooked Strawberry Jam
2 cups finely mashed or sliced strawberries (about 4 cups sugar)

1 package powdered pectin and 1 cup water OR 1 cup liquid pectin
1. Combine berries and sugar. Let stand about 20

minutes, stirring occasionally.

2. Dissolve the powdered pectin in the water; bring to a boil and boil rapidly for 1 minute, stirring constantly. Remove from stove, OR, to use the liquid pectin, omit the powdered pectin and water and use only the ½ cup of liquid pectin. No cooking is necessary.

3. Add the berry mixture to the pectin and stir about 2 minutes.

4. Pour the mixture into jelly glasses, leaving ½-inch space at the top.

5. Cover and let stand at room temperature 24 to 48 hours or until the jam has set. This makes about 6 half-pint jars.

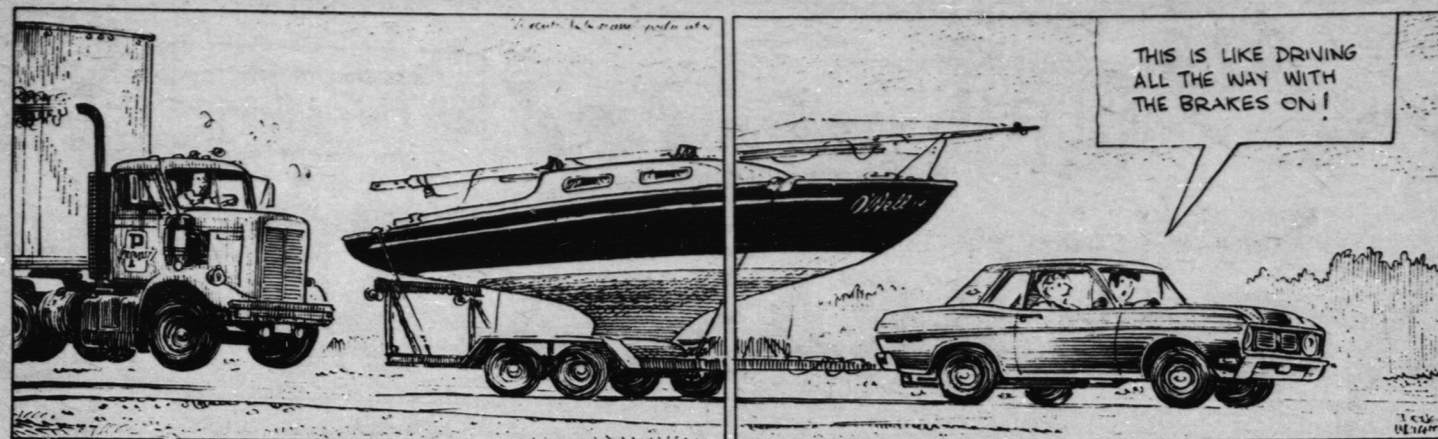

6. Seal with paraffin wax and store in the freezer. This jam will keep about 4 weeks in the refrigerator,

and up to a year in the freezer.

NOTE: If the jam is too firm, stir to soften. If it tends to separate, stir to blend. If it is too soft, bring it to a boil; it will thicken on cooling.

Forest fires usually burn most fiercely from 10:00 a.m. to 5:00 p.m. when humidity is low, winds stronger and temperatures higher.
