

Knights Of Columbus Communion Breakfast

Mr. John Friel spoke to 62 Knights of Columbus Council No. 6091 and parishioners of St. Stephen's on Sunday, February 22, 1970 in St. Stephen's Parish Hall, Cayuga.

Mr. Friel, a past District Deputy of Hamilton spoke on Columbianism and some goals of the K. of C. The Knights of Columbus exist for four reasons: charity, unity, fraternity and patriotism.

In regards to charity, he emphasized that charity of thought, word and deed are all important. Offering a helping hand or a word of praise is as much a part of charity as donations. With respect to unity, any organization can usually accomplish more than an individual. Fraternity encompasses treating each individual as a fellow Christian. Patriotism, is love

for one's country and its welfare. Mr. Friel stressed that Knights would be more than amply rewarded with satisfaction for work put into their projects.

The Guest Speaker was introduced by G. K. Dr. N. P. Huschilt, and thanked by Bro. Mike Doyle. The chairman for the communion breakfast was Bro. A. J. Pierroz. The ladies of St. Stephen's C.W.L. served for the breakfast.

Monitoring Environment For Pesticide Residues

The Provincial Pesticide Residue Testing Laboratory, located at the University of Guelph, has monitored certain phases of the environment in Ontario to establish the extent of contamination by some pesticides.

Biology Dissection At HSS

As part of the Grade 13 Biology program at Hagersville Secondary School, students returned to class on a recent Tuesday evening to complete their study of cat anatomy. They willingly gave up their evening hours, so that their lengthy dissection could be done in the proper depth. By concentrating their efforts, students and their teacher were able to save valuable classroom hours, so that other topics could be included in the course.

Working in groups of six, the students studied in detail, all the important organs and systems including the heart and circulatory system, liver and digestive system, kidneys, glands, muscles, and skeleton.

Using detailed laboratory guides, each group worked by itself. They were able to use the knowledge they had gained from a series of previous laboratory experiments as well as the two types of microscopes (light and stereo), and the variety of surgical equipment available in the laboratory. Mrs. R. Crisp, of the Science Department, who arranged the session, was on hand to answer questions. This self-discovery method, typical of the Biology program at Hagersville, allows the student to work out for himself the basic principles of living organisms.

Reactions of the students were varied, but all seemed pleased at the end of the evening. One tired student, Paul Harvey, said simply, "It helped".

Symposium on Air Blast Equipment and Pesticide Use, held at the University of Guelph, that the program has covered some agricultural commodities, and some parts of the physical and biological environment, as human tissues.

Dr. Frank said that low background residue levels were found in the agricultural commodities tested, and in the physical environment. Higher concentrations occurred in the biological environment, particularly in some of the larger fish and in fish-eating birds such as gulls and loons.

These studies have been carried out in cooperation with many branches of the Ontario government, said Dr. Frank, particularly the departments of Lands and Forests, Health, Agriculture and Food, and the Ontario Water Resources Commission.

Confirmation Service At St. Pauls

Bishop Heber Wilkinson will be in town on Sunday March 15, to administer the Rite of Confirmation in St. Paul's Church at 11.30 a.m. when the candidates will be presented by the Rector, Canon E. A. Brooks.

Bishop Wilkinson was formerly Bishop of Amritsar in northern India, where he spent the years of his ministry as a missionary. He has been assistant Bishop in Niagara for some years.

Mrs. Wilkinson is the only daughter of the famous missionary Bishop of Yukon, Isaac Stringer, the "Bishop who ate his boots." She was born, as were all her brothers, within the Arctic Circle.

The newly confirmed will make their first communion on the following Sunday, Palm Sunday, March 22 at 11.30 a.m.

Deaths and Obituaries

PHILLIPS, Mabel Tincy - At the West Haldimand General Hospital on Monday, March 2, 1970. Mabel Edwards of R.R.5 Hagersville, wife of the late David Phillips, dear mother of Dorothy (Mrs. Elmer Simington), Brantford, Andrew of Vanessa, Leroy, R.R.1, Hagersville and Emerson, Alvin and Oscar, all of R.R.5 Hagersville. Dear sister of Anson of Rockford, William of Hamilton, Pearl (Mrs. Lester), Waterford, Fanny (Mrs. Clayton Barnes) of Mount Pleasant, Minnie (Mrs. Haines) of Bowmanville. Twenty-seven grandchildren and one great-grandchild also survive. Mrs. Phillips rested at the Hyde and Mott Funeral Home, Hagersville where service was held in the Chapel on Thursday, March 5, at 2 p.m. Interment Greenwood Cemetery, Waterford. A Rebecca Lodge Service was held Wednesday evening at 9 p.m.

Editorial Comment

First Release Of Study?

An indication that it may not take five years to get something on the go for an overall plan for the area this week with an announcement of a special meeting to be held in Jarvis next week with Ontario government officials and elected municipal representatives as well as members of the joint Haldimand-Norfolk Study Committee in attendance.

It is speculated the first release on Haldimand-Norfolk Study Committee will be made at the meeting. This meeting looms as the most important of all since it was disclosed that heavy industry will be constructing plants on the north shore of Lake Erie.

It will also be a time for people not involved in the study committee to evaluate recommendations that may be made.

If some of the recommendations to be made are disclosed they should be studied carefully by elected members of the local municipalities.

After the recommendations have been digested carefully our municipal representatives should make their suggestions or criticisms known in the near future. From the meeting may come the tools necessary to create an orderly development of the area.

Genetic Gyration

Ever find it difficult to get along with yourself? Cheer up - it will be worse in 30 years or so when science expects to be able to produce the identical twin of any living person.

At least that's the prediction of a University of British Columbia geneticist, Dr. David Suzuki, who says that research into genes will allow production of "carbon copies" of any human being.

Genes are the building blocks of the chromosomes, found in the nucleus of each body cell, which determine the inherited characteristics of every human. There have been a number of recent breakthroughs in this field, including the isolation of the gene.

Dr. Suzuki, who has been conducting experiments with *fruit flies*, which produce dozens of generations in a short time, is beginning to wonder if the advances in the field are really a good thing. In the hands of irresponsible people, he fears, the ability to engineer genes could be a real threat to the world as we know it.

Production of the identical twin could be accomplished, he says, by taking a skin cell from the person someone wanted to duplicate and putting it into an egg cell from which the nucleus - and thus all its genes - had been removed. That way, only material from the skin-cell donor would be inherited and his double could be formed.

If scientists provided genetic engineering tools for leaders of powerful countries, they could control large numbers of the population and cause incalculable harm. Gene-changing viruses "could be sprayed all over the world to cause change in people's minds and bodies", Dr. Suzuki warns.

If the wrong kind of person were used as the basis for the carbon copy - and they could be produced in unlimited numbers - the world would indeed be a bleak place. Anyone could fill in the blank at the end of this statement with a name of his choosing: "All the world really needs is an identical twin to someone like"

And supposing some mad scientist came up with a carbon copy of you? It needs little imagination to conjure up the dire possibilities that this would entail. A person can get into enough trouble without a carbon copy of himself wandering around to create more. Especially if he's carrying your credit card.

Genetic engineering, of course, offers many possibilities for the good of mankind, such as the elimination of inherited diseases. But, like the unleashing of the power of the atom, its application can only be as good as the intentions of the men who put it to use.

Women Day Of Prayer March 1970

Ebenezer Reformed Church was the hostess congregation for last week's World Day of Prayer with the Rev. D. C. Los giving the address.

Rev. Los stressed the loosening of manners, customs and morals during the sixties and warned that unless responsible citizens put their shoulders to the wheel, the outlook for the seventies was even worse than that of the last decade. He urged all to work without ceasing toward bringing back a better standard of civilization, in the so called Christian Countries and to extend their services to the "Have Not" countries. He prayed for courage to combat the evils of these times.

Seven local churches were represented in the audience and the leaders of the service were chosen from these groups. Mrs. Los, wife of the minister of the Christian Reformed Church acted as chairman assisted by Mrs. Leo Miedema, organist and by a trio of ladies from the choir.

Representatives of other churches who led in the services were Mrs. Ross Dosser of St. Pauls Anglican Church, Mrs. G. Taylor-Munro Chalmers Presbyterian, Mrs. Earl Slater Wesley United Church, Mrs. Gordon Cherry, Garnet United Church, Mrs. R. A. Miller Knox Presbyterian and Mrs. Raymond Montague St. Anne's Roman Catholic Church.

The offering received and dedicated was sent to the Inter-Church Council of Canada, 40 St. Clair Avenue East, Toronto 7, Ont.

ROWDED CAMERA ROBERT BYL JARVIS RECORD

Rural Water Needed

Last year in Ontario approximately 500 dry holes were reported by drillers looking for water. Many rural and suburban homes have an inadequate water supply because the house was built before the availability of water was established.

Professor Ross Irwin, Extension Co-ordinator, School of Agricultural Engineering, University of Guelph, says that anyone

planning to build in rural areas should first get an option to drill before buying land to ensure that sufficient water is available.

Professor Irwin notes that the Central Mortgage and Housing Corporation requires that there be a water supply equal to five gallons pumped every minute before it will approve a loan to build under the National Housing Act.

Counter Clockwise

20 Years Ago

Deer hunters in the vicinity will be interested to know that a herd of fourteen were seen in the Nanticoke district on Tuesday, which is probably more than most hunters saw up north last fall.

The Women's Association met at the home of Mrs. D.C. Allen on Wed. March 1. Mrs. Telford was in the chair and Mrs. E. Newbery conducted the devotions. Twenty-three ladies were present.

After holding the Broomball Crown for the past Twenty-three years the Diarmen lost the title last Thursday night to the Jarvis Lions Club. In a see-saw battle through the entire sixty minutes, the Lions netted the winning goal with six minutes left to play. Norm Graham was credited with the goal but the dairymen protested when it was argued that the ball went in off his stomach. The referee, unable to see the ball for his stomach hesitated to rule on the legality of the play and allowed it.

30 Years Ago

Gone with the Wind opens at the Norfolk Theatre Simcoe, Friday

March 22 and continues to Thursday March 28.

Premier Hepburn hits the news again this week when he prohibited the showing of the picture "March of Time" in the province of Ontario. The premier said it was absolute political propaganda.

Hon. H.C. Nixon resigned his cabinet Portfolio on Monday and returned to the fold on Tuesday after a visit from Premier Hepburn. According to reports their differences were settled with complete understanding.

Dr. Basil N. Macaulay of Dunnville was selected as the Liberal Standard bearer for the County of Haldimand in the forthcoming election at a convention held in Cayuga on Friday.

STYLE RESTORED

HALIFAX (CP) - Robert Frame, director of the Heritage Museum in neighboring Dartmouth, has been appointed historical co-ordinator of the Sherbrooke village restoration project in eastern Nova Scotia. He will reside in the village and do historical research.
