Cost-Saving Integrated Steel Mill Hinted

Another hint that the Steel Company of Canada is planning one of the most modern up to date steel making facilities anywhere in the world came last week when the First Annual Canadian Institutional Investor Conference.

J. Peter Gordon, Stelco's president, was reported in The Financial Post as having said Stelco is developing a new integrated steelmaking operation that can provide capital-cost savings of as much as 30 per cent.

Mr. Gordon gave out a few hints of the process during his talk at the conference. The new process, which uses high-grade iron pellets fed directly and continuously into electric furnaces and thence into continuous slab casting equipment, will bypass the conventional blast furnace, coke ovens and basic oxygen steelmaking furnaces.

The capital costs within the five-million to 15-million ton capacity are said to be most attractive. It was reported that Stelco plans to build up the integrated operation gradually at its planned steelmaking complex at Nanticoke.

"We are aiming for a breakthrough to replace traditional techniques, thereby enabling us to achieve economies in construction and in costs of building new plants and equipment," Mr. Gordon is quoted as having said. In the new process, capacity increases can be put into place in smaller increments to assure a viable load when the new facilities come into operation.

Industry expansion programs must be based primarily on the home market. And here Canadian producers must meet import competition. So far, they have been much more successful than U.S. steel producers in offsetting the import threat.

"But we will remain vulnerable to a concentrated effort by offshore producers to invade our relatively small market, particularly if we are unable to maintain capacity levels of operation," Mr. Gordon said. Mr. Gordon predicted Canadian steel consumption will increase four per cent next year to 9.8 million tons. And for the balance of the 1970s the consumption

Ontario Broiler Producers To Meet With Que. Growers

Representatives from the Ontario Broiler Chicken Producers' Marketing Board scheduled to meet their counterparts in Quebec this week in an effort to hammer out a marketing agreement with Quebec farmers in that province.

According to board officials at a district 4 meeting in Jarvis Tuesday night, the Quebec producers lined up a 50-50 marketing split with Ontario following a meeting of the parties in Toronto.

The Quebec board turned thumbs down on the proposal and came up with a counter offer of their own, calling for slightly more than 39 per cent of available market for Quebec broilers and almost 50 per cent less for Ontario. Ontario board members are hopeful that agreement can be reached in Montreal this week.

Any agreement would help ease strained relations between the two areas that flared up earlier this year, which was dubbed the chicken and egg war.

"At least we're still talking even though they turned down a committee proposal," said one official. "There are problems to be solved but we must recognize that the Quebec board has significantly reduced the production of broilers to ease the market situation."

He added that overall production of broiler chickens in the French-speaking province is down more than 15 per cent this year over last.

At Tuesday's meeting, local broiler farmers got a first-hand look at the most recent developments in medication of broiler chickens from Dr. Weber, of the University of Guelph's poultry science department. Explanations

of processing factories condemnation of diseased birds was illustrated by a set of slides shown by the scientist and recommendations were made to growers on utilizing various methods of medication.

District 4 chairman Gary Sysma chaired the meeting held in the Jarvis Community Centre. More than 30 producers turned out to the session.

Plaza Building Held Up

PORT DOVER - With the Ontario government pushing for more work projects this winter, employment for some 80 area workers is being held up by the Department of Municipal Affairs.

Permission to build the \$1,800,000 Norlynn plaza on Highway 3 just east of Simcoe has not yet been received from the department and Woodhouse Township council is worried about the unemployment.

Township solicitor Robert Stanley said it is "inconceivable that a project which would hire more than 80 unemployed is being held up by a department in the Ontario government, when that government advocates make work programs."

The site for the proposed plaza is part of the 245-acre Woodhouse property that is

Spread out flat, the huge wreath proclaiming Seasons Greetings, was bolted together Tuesday night by Jarvis Volunteer Fire Department workers. The firemen have worked every night for the past two weeks to assemble the new Christmas display. (Staff Photo)

Future Water Demands Outlined To Walpole Group

NANTICOKE (Staff) - The demands for water will continue to increase as Canada becomes more industrialized and technology will have to develop in order to keep what water there is free from pollution.

That is one of the many facts the Canada Centre for Inland Waters is facing at its research centre in Burlington and one told to a handful of members of the

Walpole Township Citizens Action Association here at the community hall Friday.

Margaret Sinclair, a sociologist with the centre, substituting for the scheduled speaker Dr. T.R. Lee, said the centre is a federal government agency mainly concerned with research into water pollution.

Miss Sinclair noted there is an estimated 326 million cubic miles of water

covering 80 per cent of the planet. Of that, 318 million cubic miles comprise the oceans and 7 million more is contained in polar ice caps. Almost all of what remains is beneath the earth's surface. This means that the world's supply of fresh water available at the surface is less than one hundredth of one per cent of the total.

This amounts to about

4-H Members Presented Awards

KOHLER - Haldimand County's 4-H members were honored Thursday night when the 1971 4-H Agricultural Club Awards were presented.

F. Russell Smith, president of the 4-H Club Leaders' Association said the past year has been "one of Haldimand County's most active years. It appears to me that those objectives set out a year ago have been achieved. We now look into

the not too distant future of 1972, having gone through the pains of change in program over the past two years. Next year should be a year of straight forward participation from everyone who enrolls."

Congratulations were extended to the 4-H members on the completion of their projects by Ken Best, agricultural representative for Haldimand.

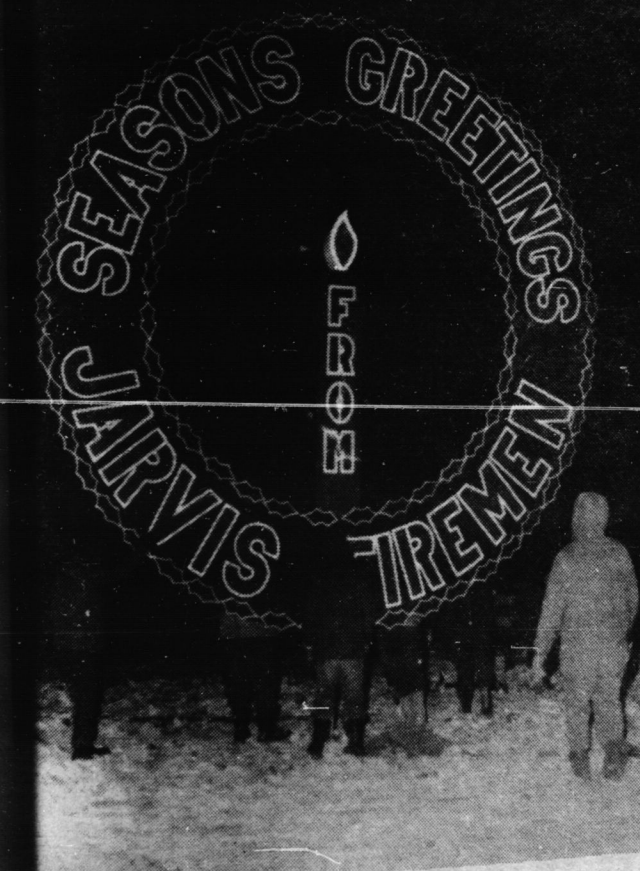

Activities of the 4-H in 1971 included a Manitoba exchange trip, an inter-county exchange to Bruce County, a provincial 4-H leadership conference, livestock judging competition, Guelph evaluation day and Haldimand bus trip, a regional conference, CNE judging competition and achievement days.

4-H Proficiency Certificates - six projects:

Sharon Burgess, Liz Creighton, Leonard Doyle, Nancy Farrell, Arlene Fox, Paula Gee, Allan Hedley, Douglas Peart, Sidney Reitsma, Linda Stallwood and Kim Topp.

Twelve projects: Robert Burgess, Jim Cowie, Alice Harvey, Charles Jude and Kim Snyder.
Eighteen projects: Wayne Burgess, Mitchell Holt and
