## Hagersville Highlights

### IMMER'S CONDITION STILL SERIOUS

Partially paralyzed, and in serious condition in hospital nearly three weeks, a swimming pool for a year old Hagersville man, William Gilbertson, a student of RR 3, slipped at the end of June 27. The result was a broken leg, and he was admitted to the intensive care unit at the Brant Memorial Hospital. Since that time, he has been very little in his condition.

### RARE FLOWER ON CACTUS

A pale yellow flower, approximately three inches in diameter, with a darker center, in the centre of a low-orange cactus in the garden of Mr. Albert Awde, 36 Main Street South, Hagersville.

Mrs. Awde brought the cactus in a plastic bag, back to Jarvis last August. It had been dug up on the northern Saskatchewan ranch of her nephew, Sam Peacock.

### ADDITION WELL ON THE WAY

Progress is being made on the enlarged, anticipated wing to the St. Andrew's Presbyterian Church on Main Street South. These renovations will give more Sunday School space, as well as making additional conveniences to the present kitchen area.

### PERENNIAL INDIAN MARCH

Each year since 1928, to mark a long-disputed right, an unhindered crossing between the United States and Canada, the Indians converge on Niagara Falls. Saturday saw many from Ontario and United States meet at the bridge, to stage their annual march.

Many aging Indians of the area were accompanied by their children on the day, as they paraded down the Lower Arch bridge.

### TEACHERS ATTEND SUMMER SCHOOL

Many Hagersville and surrounding area public school teachers are attending summer school until the early part of August.

Some of the teachers are availing themselves of the classes in Brantford, while others are attending daily, the sessions in Hamilton.

### MR. GEORGE SWING INVITED THE GROUP TO HER HOME FOR THE AUGUST MEETING.

Ralph and Louis Robbins of Wellandport are spending their holidays at the home of Mr. and Mrs. Lloyd Best.

### WMS Picnic

The Mary Edith Group of the WMS held their July meeting at the Wilson MacDonald Museum in the form of a picnic. Although the attendance was small a very enjoyable afternoon was spent by those present.

Following the noon meal a regular meeting was held in the museum, when Mrs. W. Campbell, Mrs. G. Swing, Mrs. W. Lint and Mrs. E. Keen took part. It was decided to send \$30 in towards our allocation. Mrs. Sider told of some interesting visitors who had recently been at the museum. The members enjoyed looking at the many new things acquired.

The ceremony this year also marked the death of the Leagues founder, Chief Clinton Rickard, 91, who died earlier this year.

In tribute, Harry Hill, of the Six Nations Reserve near Hagersville, led a riderless horse in the parade.

### LARGEST PICNIC HELD

"It was the largest picnic I have ever seen at the Hagersville Park," said one onlooker of the Laidlaw Transport, Social Club Picnic.

The gathering, with over 100 in attendance was held in the park on Sunday afternoon, July 11.

Many activities for the afternoon, kept all amused, together with the convenience of the wading pool for the little ones, and the Lion's Swimming Pool.

Games of guessing, tug-o-war, horseshoes, baseball, races, etc., were all enjoyed.

Many door prizes, concluded a most happy afternoon.

## Federation News

by Otto Crone

Ontario farmers are becoming increasingly concerned about the whole area of farm inputs - their supply, their price, their warranties and their durability. This questioning is due to the well-known fact that we are only keeping a small proportion of our farm revenue as net income while we pay the bulk of it for necessary farm inputs. However, if farmers were able to receive better service from farm supply companies and pay lower prices for inputs, would then be able to retain more of our farm revenue as income.

The Ontario Federation of Agriculture, in an attempt to fulfill its duty of reflecting and satisfying these concerns, has embarked on a program which hopes to keep farmers better informed about farm inputs - particularly their prices. The OFA is also encouraging farmers to investigate the local farm inputs scene. If savings are available through bulk purchasing or importing, then OFA will assist or show groups the means to achieving a more financially successful end.

Of course, the Federation has no intention of becoming a full-time farm supply company. It does not have the staff, resources, inclination, nor does it have the desire to by-pass co-operatives. In fact, the OFA prefers working together with the Co-Op to benefit farmers. This has already been noticed when the Federation drew our attention to the benefits of buying Co-Op fertilizer in bulk and in the promotion of UCO's baler twine importation program.

## How The Trustee Serves Your Community

What is a hospital trustee? Not what most people think.

"Many people think because government finances hospitals, trustees are just 'rubber stamps' to put community approval on expenditures designed and defined by some oracle at Queen's Park or Ottawa."

Charles I. Black recently commented. Mr. Black, a former president of OHA, noted that other people think of a trustee as belonging to a sort of social club "which gets together (with the Women's Auxiliary) for afternoon tea once a month."

Still others, he suggested, think of the hospital board as a "loafing farm" for "aged politician war horses who have come to the end of their day of combat in the municipal arena and are looking for a peaceful resting place not completely outside the public forum."

Any trustee doing his job could tell you none of these beliefs are true.

The trustee is the prime link between his community and the hospital. Although governments do provide operating capital as well as most of the money for capital expenses, the trustee still has a major task from time to time in raising additional money for his hospital. For a hospital's financial needs are great. Governments don't pick up all the cost of capital expenses for new buildings and installations. Nor do they pay for the mass of equipment the hospital must constantly keep modernizing.

But financing is only a part of the trustee's labor of love.

The trustee in the final analysis is responsible to his community and to the governments for the total operation of the hospital. Although the board delegates much of this responsibility to the medical staff and the administrative staff, it remains the ultimate legal authority. It makes the final decisions respecting policy.
