Blood

hen people donate to charitable organizations ke to feel that their donation will serve a useful and not be wasted. That may be part of the for the many blood donors who continually to Red Cross blood donor clinics.

any of there people realize how important a donation is because either they, some member of amily or a friend has at one time needed a blood sion to stay alive. In some instances the need for can be dramatic with all the urgency of a life and tory. What most people do not realize about the oss blood transfusion service is that although the or blood may not always be urgent; it is always a ous need. Approximately 1,000,000 units of will be required for transfusion therapy for in Canadian hospitals this year. That means an of one unit of blood must be collected every 15. of every working day.

all of this blood will be transfused as whole Wastefulness you say! It is not so. It is just that science now knows more about blood and the can be made of it.

have probably heard the phrase, "Give blood a life." It sound almost too wonderful and to be true. But it is true in many cases.

at is not known is how many lives one donation elp save. Yes, it is possible that one donation we more than a single life because of what is lood component therapy. How could it be? Well gy and science enables whole blood to be down into several component parts some of re packed red cells, platelets, gamma globulin, oumin, fibrinogen or Rh immune globulin. packed red cells may be used in the treatment

nia. Platelets may be used in the treatment of Gamma globulin is employed in the n or modification of measles, mumps, polio ctious hepatitis. Serum albumin is useful in extensive burns and shock. Fibrinogen produces tic cessation of bleeding and Rh immune is used medically for the prevention of tic disease of newborn babies.

Red Cross believes that it is doing its part to at your donation serves a useful purpose. But is on you to donate your blood. you donate blood the entire process takes

ut 30 minutes from start to finish including gistration, rest and refreshment. The actual lood takes only four to five minutes. a blood donor, you might help save a life.

ise, Unwise And Otherwise"

by The Old Owl WHAT HAPPENED TO THE BRITISH EMPIRE?

ther day a man said to me that the collapse of Royce Auto Company, and of a huge auto company, together with the appearance of St. Paul's Cathedral walls made these cracks signifying the collapse of Britain as a whole. to this was the 70 years ago Britain was of the largest and most widespread Empire vorld has ever known. Queen Victoria had been as Empress of India and Indian kings were ride behind the British King, even though they were absolute rulers over millions of their ians. If you looked at a map of the world you bright red patches on every continent and of islands. The biggest patch was India but a an from Cairo in Egypt to the Cape of Good ng all the way through British territory. Of

nada and Australia were other big patches. was within the lifetime of some of us. What to the British Empire? It was not a matter of lefeat, Britain lost some battles but usually to win in the end, moreover no other great ose to take over the Empire. Each in its own sia and the United States are trying to build ires of their own and a mighty poor job they g of it. One of the great strengths of the British as the idea of fairplay and justice for everyone. neither Russia nor the U.S. has any intention by such a rule

oth world wars the United States waited for a ore joining Britain in the struggle against But U.S. capitalists were reaping huge harvest war material to Britain, in payment for which over the ownership of many long estblished ms. At the same time the British (and French) led by India demanded complete ence. This was granted partly because Britain, by the war that saved civilized Europe, could g else. So in compariatively few years Britain

can be done about it? As I see it we need a Francis Drake. It was Drake who, with the Queen Elizabeth I, won for England the of the seas. This made the Empire possible. England needs is a great man who will lay the of a new British Empire, or Commonwealth. not based on military strength but on the old stice for all, of fair play all round. May be Mr. ip to Africa will do something to lay the s of such an Empire, or Commonwealth.

Butt's Bakery, Jarvis, and later with Canada Bread Co.

The following copy is from Pen Scissors and Paste

Up in Norfolk County there is a movement on foot to discredit the Tobacco Marketing Board. We recall, about ten years ago, reading some very fine editorials in the Simcoe Reformer defending the Board, when a similar agitation took place. This week the Editor of The Reformer is back in the old groove so we will look forward to future editions with anticipation. There is nothing quite so interesting as the efforts of an editor crusading for a cause he thinks right.

30 YEARS AGO A Fairey Battle Bombing plane on one of the routine flights from the No. 1 Bombing and Gunner School made a forced landing yesterday shortly after noon, when engine trouble developed. The plane came down in the woods on the H. B. Kindry farm a short distance from the training field. It is understood the plane had just made the take-off and was gaining elevation, wand was gaining elevation, when the trouble developed. Witnesses said the plane trimmed off the top of several trees before coming to a stop. The crew was unhurt and were able to get

Hey, winter! Take off!

March is the time when all my sturdy northern resistance is gone.

As a last vestige of bravado, I can still tell people that the zero weather and the new storm on the way aren't so bad; and that out on the prairies where I was brought up this sort of thing was what we called Indian Summer.

But when I say it, I can't even work up a grin any more. I was sitting as far back as my chair would go, just a minute ago, looking out of my window. The long bare branches on the big maple are being whipped around in the east wind. That's the one that brings storms in our parts.

The garage roof is covered with snow. The yard where the kids play in summer hasn't a footprint on it; and the snow is crusty and mean-looking.

I long to walk along a warm street and see the old people out again along the sidewalks. once more free of the worry of a sudden icy slip, a broken hip or arm, bed forevermore.

And to see last summer's children out in sunny playpens, like baby sparrows out of the nest for the first time stunned by the wonder of where they are.

And to see young mothers on their hands and knees on their sun-lit lawns administering last rites to dandelions, or poking around in the warm earth of their flower beds with trowels (Valentine presents?) Even the ones who couldn't tell a pansy from a Lombardy poplar without a program.

Those are the wonderful times when the front and back doors are open and cooling breezes blow through the screens. Up into the north country

from the cities on Friday nights, the great motorized slalom race is run. First along the four-lane highways. Then on the two-lane ones. Then a turn-off to a graveled road, and finally down a winding trail until the car creeps in beside a quiet cottage and the engine is cut and they are there, and that is all that counts.

Men fish, and bait hooks for their girlfriends or wives, or extract hooks from fish for do that - but, if the truth were known, could make a tiger run for its life if the need

were there. Last night I was watching a movie on television and I saw one of those range fences cottonwood or poplar poles wired to posts to keep stock in (or at least make them

You'll think I'm crazy, but for 10 or 15 minutes after that I didn't notice what happened in the film. I was entirey lost in thought, walking the line fence on our hundred the new breaks are, from trees or branches brought down by the winter storms. And I would have given any material possession right then to be walking that fence on a sunny Saturday in May. With fence wire looped over one shoulder, my wire cutters in my pocket, and a hatchet to cut poles I needed for fixing the fence. And the beautiful world alive around

Is it possible to get cabin fever while living in a 4-bedroom house? I think so, doctor, Here, take my pulse.

Every summer when the weeds are high, I promise myself that I'm going to clean out the groundhogs the following spring. But this spring once again I'll be so glad to see them that I'm liable to run up and shake hands and ask if there's anything that I, as their landlord, can do.

I can hardly wait until the first day I can walk up through the poplar bluff around the spring and hear the brook trickling through the snow that will be left in the shadiest places. And to hear the chipmunks again, the orioles, the partridge drumming. And maybe to see a spotted fawn suckling its mother on our meadow again.

Maybe you recognize these feelings, too. Each in his or her own way. They are the yearnings of the last long lap before the land gets warm
