## Regional Study To Be Split

SIMCOE — A Regional study committee will remain active but not on the same basis as it did for the

last two years under the Haldimand-Norfolk study committee.

In a joint meeting Tuesday between the councils of the two counties a resolution was passed that stated the Haldimand-Norfolk study committee be re-established with equal membership and an executive to set up the necessary committees to study functions of the counties on an individual basis as well as hold joint meetings on matters of mutual concern.

The study committee was originally ordered set up to assist the Ontario government and had mostly appointed members to get local views and recommendations on the requirements of the area over a projected period of expansion. The new committees will be mostly elected reeves and deputy reeves of the two councils.

The most important aspect of the study group is the question of whether the area will need a regional government and if so how it would operate as well as be financed.

Reeve Ted Powell of Cayuga, who put the resolution said the finances would be one area that the

See Page 15, Col. 1

The bridge that spans the Grand river in Cayuga gave the Ontario Department of Highways some concern this week. Rollers that set on the cement piers in Cayuga gave the bridge seized on three of them and broke away some of the cement. Workmen have been operating around the clock to repair the damage. (Staff Photo)

### INCREASE \$373,362

## Haldimand Sets Education Budget

The Haldimand County Board of Education will require less money from the taxpayers in 1971 than was levied in 1970.

The total budget of \$6,957,442 is an increase of \$373,362 over 1970's budget of \$6,584,000. Due to an accounting procedure introduced in 1970, which involves an accrual of salaries, a more accurate comparison would be \$6,957,442 in 1971 with an increase of \$618,971 over 1970 expenditures of \$6,338,471.

as well as staffs, it became encouraging, as these groups, made creative suggestions which have affected savings. We believe the reductions will, in no way, detract from our high quality of education.

In the elementary school budget, the committee has been able to incorporate several improvements. An opportunity class, a class for perceptually handicapped pupils, as well as another speech teacher are included in the budget. As the board is of the opinion that the area of special education has shown success in the previous years, the additional emphasis appears warranted.

The elementary library budget has received an increase. With more library facilities in our schools, the extra "shot in the arm" will provide

reading and reference material much needed in today's educational program with a place to store.

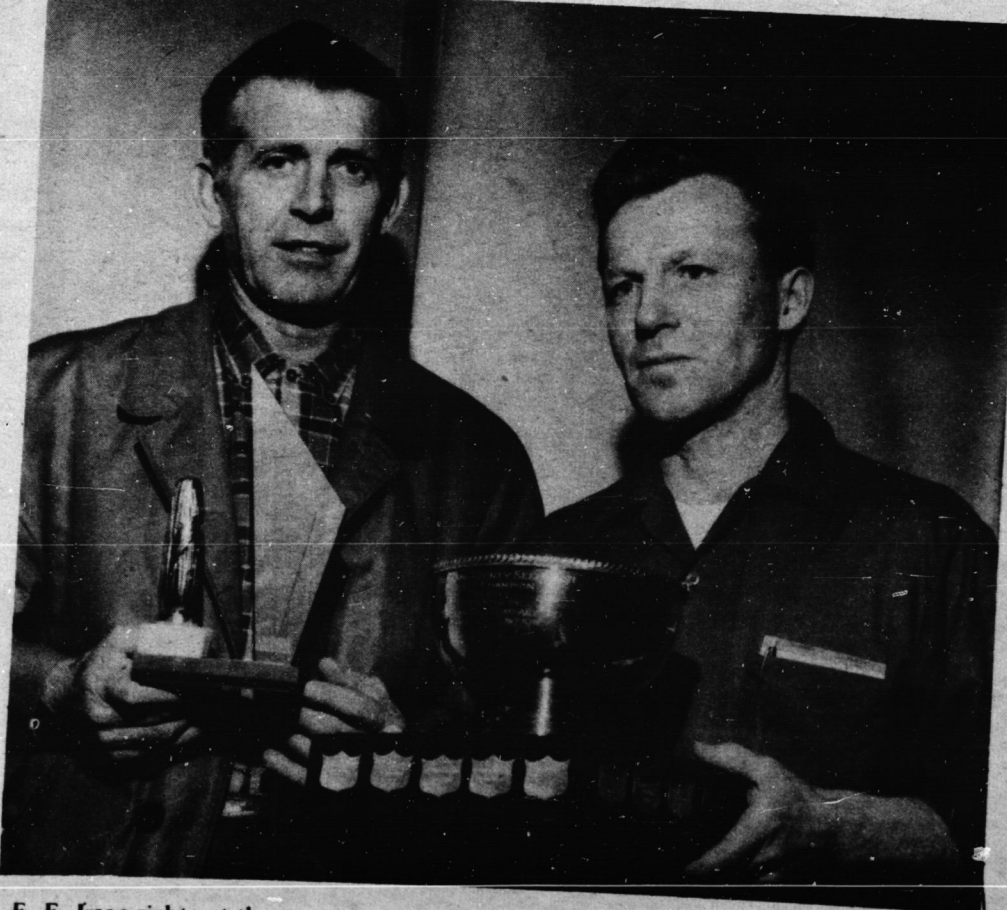

An important consideration, of course, is our ability to pay. As stated above, Haldimand taxpayers will be asked to raise fewer dollars for education in 1971 than in 1970 — actually \$108,749 less. With additional assessment in 1971, tax bills should decline. In Caledonia, Dunnville, Hagersville, Canboro, North Cayuga, Dunn, Moulton, Rainham West, Seneca, Sherbrooke

### Weekly Weather

Milder but rainy weather is the regional outlook of the Simcoe Weather Bureau.

Mainly sunny today with chance of snow or rain Friday, rain Saturday and Sunday.

Low temperatures will range in the 30s while highs will be in the 40s, said the forecaster.

E. F. Isaac right got the most points and the champion silage award presented by John Steele of the Silo Company of Canada at a well attended Haldimand Corn and Forage feed classes. (Staff Photo)
