Both sparrows are dark brown, with streaked backs, buffy underparts and a bold face pattern. Leconte's has a bright, almost orange face with a greyish cheek patch, the sharp-tailed has a similar head pattern but colors duller, it has heavier streaking on the underparts.

## On The Farm Front

CAYUGA - Haldimand's annual spring Corn Night will be held at Cowan Farm Supply, Dunnville, on Monday night, April 17. The program will include Dr. Lee of the University of Guelph engineering school on fertilizer placement and planter adjustment. Glen Anderson will discuss practical ideas on spraying and Don Hill will outline the corn-exchange. Everyone is welcome.

A new activity for 1972 is a soybean discussion planned for April 24 at Canboro Community Centre starting at 8.15. Those planning to grow soybeans for the first time are encouraged to be on hand to hear local soy-

bean growers tell of their experience with the crop.

Lex Rutherford of the Ontario Livestock Branch says that the Canadian record on the use of stilbestrol by beef producers is a good one. The economic advantage of the use of stilbestrol in beef production is very significant. Producers are encouraged to maintain the record of proper use so that there will never be a reason for its withdrawal from the market.

Information on the new low rates of Crop Insurance for 1972 is available from Bob Young, Dunnville, or Albert McBurney, Caledonia.

Directors of the Haldimand Soil and Crop

Improvement Association would like to hear from anyone interested in 1972 projects. Up to 10 members will be enrolled in a Crop Management project involving an advisory service that would include machinery and crop production management calls at the farm.

Crop cost studies will be conducted with the regular high yield competitions but would also involve those on the Crop Management program and anyone else that is interested.

The regular crop projects and demonstrations will also be conducted. A list of projects proposed has been forwarded to members of the association.
