The machines meet safety specifications set by the American Tractor Pullers Association. These include fly wheels and dead-man throttles to prevent the tractors, which often travel with their front wheels several feet in the air, from toppling over on their drivers. ## Before you use your back, use your head.

Throwing your back into something means that maybe you might just throw your back out. That's painful and no way to enjoy the nice things in life. When you've got to

move or lift something, first test the weight. If you can't lift it easily, get some help. That's self-defence. And it works, for you and your family.

The sure way to safety is Self-Defence.
