

Stelco To Begin Next Year

(continued from page 1)

(half) are to be dedicated to the plant, Mr. Gordon said. Much of the remaining area will be taken up by an industrial park. Customers and suppliers of Stelco have already made inquiries about this complex, he said, and it is hoped the park will phase along with the plant.

"The establishment of such a facility will enable us to contribute to the development of the entire area by providing means whereby secondary and service industries can locate in an orderly fashion on properly serviced sites in a way that will complement and en-

hance the development of surrounding communities."

ENVIRONMENT

The Stelco president went on to say the most significant features of the Lake Erie development was the approach the company was taking toward the environmental question.

"We have included in our design and in our layouts the latest in equipment and in concept for the protection of the environment. We have attempted as well to provide ample protection for the natural surroundings of the area not only in the layout of the plant itself and innovative use of landscaping techniques, but

also in our approach to the future development of the Industrial Park on the northernmost 3,000 acres...."

Noise will be limited by earth barriers, coniferous trees will be planted in and around the plant and less water will be drawn from the lake because it will be cooled and reused in the system. Any water returned to Erie will meet the ministry of environment requirements, Mr. Gordon said.

The new plant will be the first major project designed to the metric system.

When questioned about housing in the area for the influx of laborers, Mr. Gordon said the company is not going to be involved in the housing end of the stick, but expressed hope the existing communities could handle the increase at present.

On questions concerning the development of Highway 6 and 3 for commuting, Mr. Gordon said these problems had not been specifically solved. The company plans to hold a public meeting sometime in January.

John E. Hood will be general superintendent of the new plant.

Woman Candidate For Councillor

(continued from page 1)

Library Guild, is on the Library Board and is a member of the Hospital Auxiliary.

In the past she has served on a ratepayer's association in Etobicoke township and on the Home and School Executive in Peel. She worked as a public school teacher in both Peel and Haldimand.

Mrs. Mackereth is in the race because she feels women should become involved.

The other candidates are concerned with recreation and the water and sewer issue which

she too feels is terribly important, she said. But, she is also interested in the library and recreation activities which are non-athletic.

"I'm just as interested in the water situation as anybody," Mackereth explained. And, as for a new fire hall, she's "been unhappy on how slowly they (council) have moved on that."

Mrs. Mackereth was pleased with the province's decision to form a regional police force out of the existing towns' forces. She told the Record last week she thinks the Hagersville

police do a good job and would hate to see them go.

Another major concern of Mrs. Mackereth's is that she feels the people should know what's going on. An elected representative should not just be available, but take definite action to inform constituents..... by means of newsletters or setting aside a definite time period for discussing problems. It is important to be available, particularly when the council moves out of the area, she said.

As far as being a woman candidate, Mrs. Mackereth feels voting should be done on the basis of the runner's qualifications; not on their sex.

Graduation

Family and friends of Deborah - Ann Taylor-Munro will wish to congratulate her on successfully completing government examinations and being granted Certificate of a Registered Medical Technologist which entitles to append letters R.T.

Debbie is presently employed in the Laboratory of St. Catharines

General Hospital, in which hospital she was born on December 4, 1952.

Graduation exercises for the Hamilton and District School of Medical Technology are scheduled for the evening of Friday, November 30 in the Auditorium of Mohawk College, Hamilton.
