

## Friends 'n Neighbours

Mrs. Jessie Miller of Grandview Lodge, Mr. Cameron Miller of St. Catherine's and Mr. Harry Bagley enjoyed the Oddfellows oyster supper on Thursday night.

June Awde, daughter of Mr. and Mrs. Allan Awde of Jarvis, met Princess Anne last Tuesday when she visited Mohawk College.

June was donating blood when the princess and her husband Captain Mark Phillips toured the Red Cross clinic at the school.

"They must have taken a lot from you," Princess Anne said to June as she lay on a cot with a cloth on her head.

June explained to her it was her first time to donate, but she would do it again.

A new house is being

erected in the village of Cheapside. Revival meetings have been in progress for one week at the B.I.C. Church. Rev. Robert Rolston of Sherston has been conducting the Evangelistic services. Sunday night was closing.

Mrs. George Smith, accompanied by Mrs. Clare Kenner of Brantford, spent a few days recently with Mrs. W.H. Wilcox of Harrisville, Michigan and also visited Mr. Wilcox who was patient in Alpena Hospital in Michigan.

Sunday guests at the home of Mr. and Mrs. George Smith were Mr. and Mrs. John Donaldson of Pont Hill, Mr. and Mrs. Leslie Smith and daughters, Carol Ann and Pamela, of Port Colborne and Mr. and Mrs. D'Arcy Carver of Stony Creek.

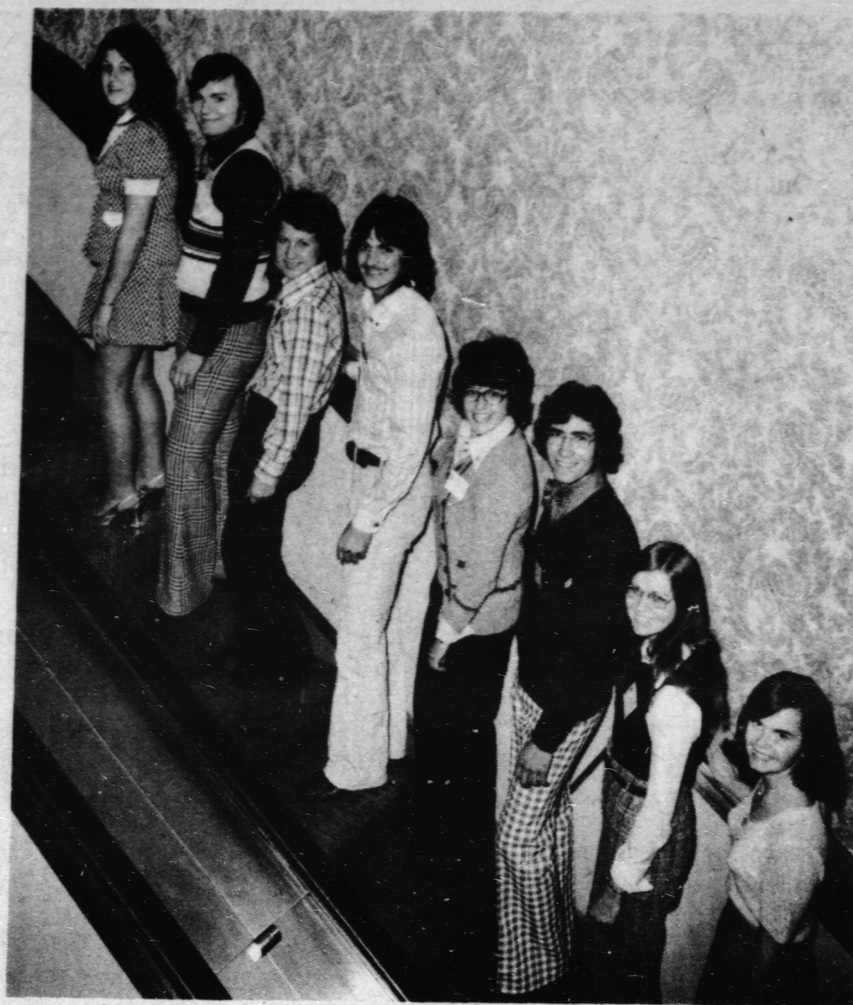

Mrs. Earl M. Sider is slowly recovering from a sprained ankle she received five weeks ago.

The Rev. Earl M. Sider was guest speaker at South Cayuga Baptist Church Sunday, Nov. 17th.

A community shower was held at the Cheapside Hall for newlyweds, Laurie (Hare) and Jim Armstrong last Thursday night.

We who live "South of the Border" (Highway 3) in the "City of Nanticoke" are getting used to changes in our Regional area. This goes to show "we are never too old to change."

A number of area senior citizens have "gone South" already which makes the Selkirk-Cheapside and area group a bit smaller. Everyone seems to enjoy the Thursday afternoon social event and especially the evening lunch.

**4-H DELEGATES AT NATIONAL CONFERENCE** - Eighty delegates from across Canada took part in the four-day National 4-H Conference, with the theme "The Due Process of the Law," an examination of the Canadian system of justice. Ontario delegates attending the recent meeting in Toronto were (left to right) Nicole Groulx, Base Line Rd., Ottawa; Mark Henhoeffter, Westmount Rd., Kitchener; Nancy Verboom, R. R. 3, Jarvis; Joe Paolastini, Ridge Rd., Grimsby; Debra Hill, R. R. 2, Thorndale; Elgin Craig, R. R. 4, Brampton; Bonnie Wilson, R. R. 4, Thamesville; and Brenda Hartley, R. R. 1, Plagrave. Included in the conference program were tours of the Royal Agricultural Winter Fair and the Ontario Science Centre and visits to Niagara Falls and the Ice Capades.

## Sunshine Club

by Ruth Hagan  
The Sunshine Club members met at Mrs. Ruth Hagan's home on Thursday, November 21st with five tables of P.O.S. in play.

The winners of the Hoss games were: Ladies' High - Nina Stone and Ladies' low went to Madeline Corrigan. Men's high - George Reu and Men's low went to Allan Smelser.

The Travelling Hoss was won by George Swing. It was two boxes of Jelly Powders.

Our next meeting will be back at the I.O.O.F. Hall on Thursday, November 28th at 1:30 p.m.

A card of sympathy was sent to Mrs. Richard White in Hagersville in the passing of her husband. They were one of the first who joined the club back when it started in June 1972.

**New members of the Jarvis Lions Club** were photographed at their induction meeting with District Governor Ken Christie (2nd from right) by Lion Jack Cooke. They are Rex Chambers, Martyn Cooper and Jim Hall (far right).

## Tests Show No Defects In Three Generators

Modifications will be made to the end rings of three turbine generators at Ontario Hydro's Nanticoke Generating Station on Lake Erie to

get them back into service as early as possible.

The units were shut down pending investigation of an explosion and fire at the fourth unit last July 31st.

The modifications could make one or two units available for service on a limited basis at 80% capacity by mid-December.

Tests have revealed the fire was caused by a failure of an end ring of a generator rotor. While tests on the other three generators have turned up no defects, short term modifications are being made to reduce the risk of similar faults developing in other units.

In the longer term, new end rings will be installed in all of the Nanticoke generators.

End rings of one of the generators planned for future installation are to be modified at the plant of C.A. Parsons Ltd., manufacturers of the generator, in Britain. After tests intended to prove the rings, as modified, are satisfactory, the rings from the other shut-down generators, in transit to England, will be modified and returned to Nanticoke for installation.

The fire-damaged unit is not expected to be available for about a year.

If the Nanticoke units are brought back into service as now scheduled, they will add substantially to Hydro's generating capability during the winter period when power demands are greatest.

## Long Range Hydro Plan

Darcy McKeough, Ontario Minister of Energy, presented on July 11, 1974 an Ontario Hydro Long Range Plan.

Alternatives I, 1993 and Alternatives III, 1993 show a possible four more generating stations on Lake Erie.

The report indicates the possible requirements and location of generating stations and bulk power transmission to supply load in various regions of Ontario up to 1993. And it discusses some factors which must be taken into account in the long range planning process, the constraints which are present, and the options and trade-offs available.

Mr. McKeough stresses the long range report is not a comprehensive and complete documentation but rather a vehicle facilitating public discussion.

"The sources of energy available to Ontario dictate that policies with respect to the province of electrical energy must be far-seeing and relevant to the realities of the industrial production and needs of the citizens," Mr. McKeough said.

The report points out since the number of undeveloped sites now owned is small it will be necessary to purchase sufficient additional sites for developing at least 25,000 MW of generation by 1993, with some space for the additional generation required in later years.

This in itself is a formidable task.

The ideal sites for a new generating station would meet the following requirements:

- a reasonable level with good foundation conditions
- close to the fuel delivery system
- in a location aesthetically and environmentally suitable
- in a location which will not interfere unduly with competing land uses.

"To meet these requirements there is a need for purchasing several large sites on the shore of the Great Lakes to the east, west and north of the Toronto-Hamilton-Niagara area..." the report says.

There has been some speculation that land optioned in the South Cayuga vicinity of Haldimand-Norfolk on Lake Erie will be a future generating station site.

Since the proposed use of that land bank has not yet been made public, this possibility cannot be ignored.

The report concludes:

Ontario Hydro's electrical load is expected to double by 1983 and may redouble by 1993. To maintain an adequate and reliable supply, a major expansion of the power supply system will be necessary.

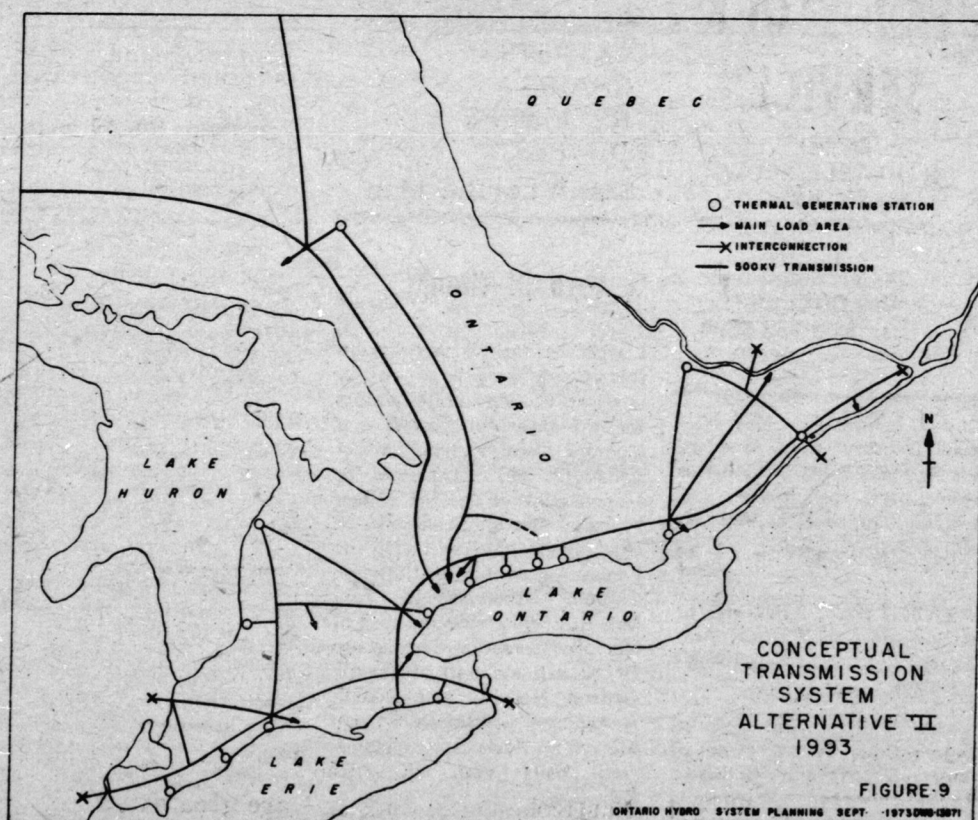

(2) In designing the system it will be necessary to make trade-offs within and among the technical, ecological, social and group action areas. The basis for these trade-offs must be determined in cooperation with the Government and through the public participation process. This will lengthen the lead times required for projects.

(3) As a basis for long-range planning, it should be assumed that most of our new generation requirements in the next 20 years must be fulfilled by construction of mainly nuclear stations supplemented by fossil stations.

(4) Because of the long lead times in purchase of sites and development of generation, sufficient new sites and main transmission corridors should be acquired now to satisfy our requirements for the next 20 years.

(5) A major build power transmission system will be needed, and plans for the next 20 years should be made on the basis that this will be 500 V AC.

(6) Because of the state of development reliability and cost of 500 KV cable, all early KV circuits should be overhead. Long-term plans should assume overhead construction except in critical areas. Considerable effort must be expended to minimize the effect of overhead circuits on land use, aesthetics, and the environment.

## Haldimand Board Discusses Community Use In Schools

Vandalism could be curbed by increased neighborhood involvement in schools, Haldimand Board of Education Chairman Don Duxbury told trustees in Cayuga last week.

Mr. Duxbury and Board Superintendent Ernest Smith recently attended a conference on Community Use of Schools in London.

Mr. Duxbury said they visited a school in a poor section of the city.

Vandalism dropped considerably there after the school involved the people day and evening, he said. "Pride people have in their neighborhood can be an advantage..."

Mr. Duxbury said he was sure the new Board in '75 will be anxious to see more use of school facilities by the community.

Trustee Jennifer Eustace commented she finds the new concept exciting and hopes the Board can work closely

with municipalities to bring schools closer to the community centre format.

Mr. Duxbury and Mr. Smith both felt the trend throughout the province is to provide greater and more economical use of school facilities by community groups.

Direct cost would have to be borne directly by the ratepayer or possibly the Ministry might provide additional grants for such programs.

The Haldimand Board will review its policy on school use in 1975. Also at the Board meeting:

\* Brenzil Construction was awarded the contract in the amount of \$1,775 for the footings of the Board's expanded maintenance facilities.

\* The Board is in the process of developing a new science program covering grades 7 to 10.

In the past the Board has been utilizing the

services of Gordon Overend, Consultant from the Ministry of Education. Since he has retired, his service is no longer available through the Ministry.

However, the Haldimand Board will continue to use Mr. Overend's services on a private basis at a cost of \$690.

\* All first year Caledonia students who wish technical education will be allowed to attend Cayuga Secondary School.

This is expected to decrease the enrolment in Caledonia by at least 15 pupils.

\* The break-in at Cayuga Secondary School November 13th was a repetition of one two years ago the Board learned.

Welding equipment from the shops was used to cut through the fire door of the vault.

Only \$4 was stolen. However, damage was estimated between \$1,200 and \$1,600.

## Federation News

by Otto Crone

Canadians should not react in anger to the quotas on beef and pork imposed by the United States, but

neither should Canada back down and open its borders to a flood of U.S. beef, eggs and turkey. The Canadian government must stick to its guns or Canadian trade policy will be set in the United States from now on.

This is the time for the Canadian meat producers to stick together. The United States market is 10 times as big as Canada's. A small percentage of U.S. production is large enough to swamp the Canadian market. Even a large percentage of Canadian production would have little effect on the large U.S. market.

Yet, Canada's quota

on live cattle imports from the United States was more generous. It is equal to the full five-year average of imports from 1969-73.

In return the U.S. slashed imports of Canadian cattle and dressed beef to a small percentage of Canada's normal exports.

Although Canada imposed no quota on hog imports from the U.S., that country cut Canadian hog imports nearly in half.

U.S. cattle build-up was accelerated by the price freeze and the U.S. government wants Canadians to pay for its mistake.

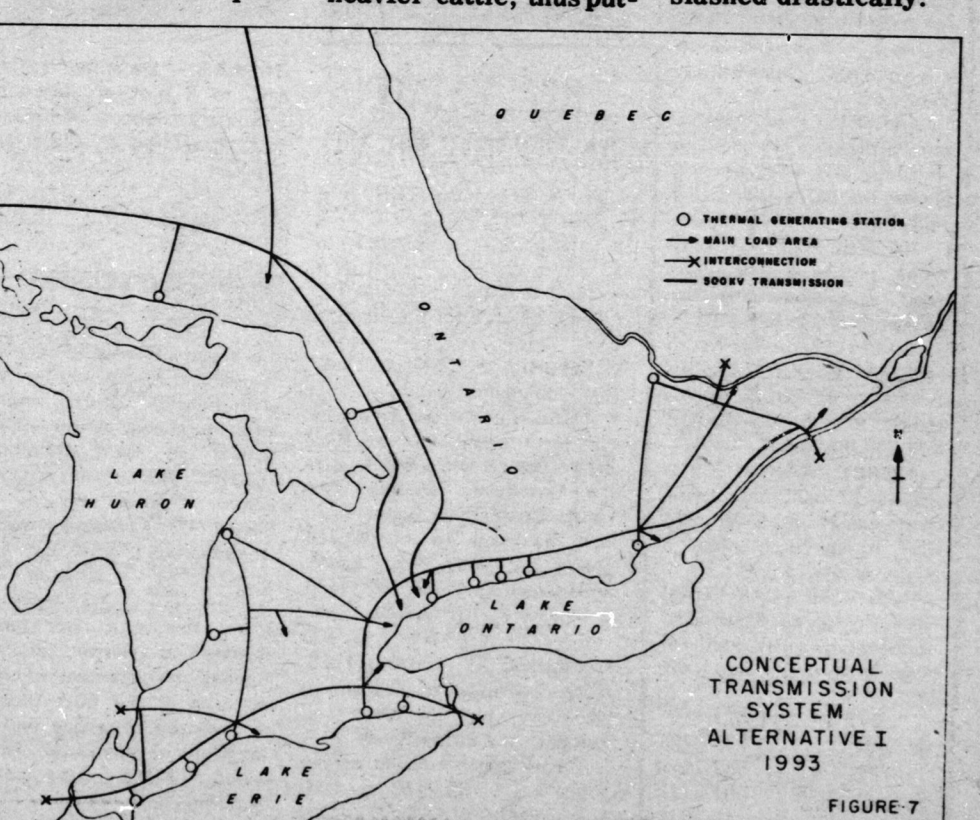

U.S. cattlemen held back cattle in large number until the price freeze was removed in September 1973 and then rushed to market heavier cattle, thus put-

ting even more beef on supermarket shelves. In addition, per capita beef consumption in the U.S. in 1973 fell by six pounds, an amount of meat equivalent to approximately 70% of total annual Canadian slaughter.

In Canada, per capita consumption fell by only one pound in 1973. U.S. cattlemen would like to market their surplus in Canada at higher Canadian prices. However, this must not be done; their surplus would drive Canadian prices way down.

The U.S. wants to use the Canadian market as a dumping ground and have Canadian farmers pay for the price-freeze mistake.

Now Canada is being asked to help even more by having her exports slashed drastically.
