

## Brakes On Declining Enrollment

(continued from page 1)  
"This is good news," Mr. Duxbury told trustees at a meeting in Cayuga last week. And with more development (Stelco and Texaco) coming to the area, Haldimand will hopefully have more students to fill out the schools again and then be able to provide better programs, he said.

To Jake Fransen, Director of Education, the present change in Haldimand is due to more city families setting up homes in the rural areas.

Stelco hasn't happened yet, so this is not that group of people, he said. "This is people moving out to the country."

Since 1969, the year all students started attending kindergarten, the kindergarten enrollment has been decreasing. But now all of a sudden it is up. From June '74 to September 6, it has jumped 32 per cent.

Secondary schools in the area hit their peak enrollment in 1971 with 3,037. From '71 till this year's show of an increase, they were on the decline. It will be curious to watch next year to see what will

happen, Mr. Fransen commented.

The 1973 enrollment for each of the high schools under the Haldimand Board and their maximum capacity (in brackets) are as follows: Caledonia High School - 319 (390); Cayuga Secondary School - 900 (1230); Dunnville Secondary School - 931 (1310); Hagersville Secondary School - 782 (1160).

The Hagersville school had a peak enrollment of 949 in 1970. Its decline was a deliberate effort on

All design approvals are given by Texaco in Houston.

the part of the Board, Mr. Fransen explained. They saw the development coming to the western edge of the Haldimand territory and realized they would have to provide for more at Hagersville. Mr. Fransen said the Board changed the boundaries so more students would be switched to Cayuga from H.S.S.

The Haldimand Board is not even dubious about a new school for Jarvis. It's going to happen, Mr. Fransen said.

However, the need has to be proven to the Ministry before they will allow a new school to be built.

Mr. Fransen expressed hope the Jarvis School will be feeling the pressure of students by 1976.

## Leave School Early

Fourteen and fifteen-year-old students may soon be able to leave school with the approval of a special Supervisory Board.

Legislation, would allow 14, 15 and 16-year old pupils to leave school under certain conditions is pending Haldimand Board of Education trustees were told last week.

In the past, exceptions have been made when work permits were issued for a limited period of time.

The Supervisory

## ANNOUNCEMENT

W. PETER MURRAY

Formerly with the firm of Lash, Johnston, Sheard and Pringle of Commerce Court West, Toronto where he articulated and practised in general commercial law and trial law is now associated with Arrell, Brown and Osier, Barristers and Solicitors at Caledonia, Ontario.

Mr. Murray is the son of Mr. and Mrs. Hope Murray of Caledonia, attended Caledonia High School, McMaster University and the University of Toronto, Faculty of Law, 1967-70. He was called to the bar in March of 1972.

Peter is residing with his wife Donna at the Argyle Heights Apartments in Caledonia.

## Drinking Water For Erie

(continued from page 1)  
ations Supervisor Bob Cameron says.

"Wide setbacks will minimize sound and provide green space. And more than 42,000 trees are being planted to screen the industrial installations from neighbouring properties and roads."

The refinery has been designed so noise is limited to 90 decibels, Mr. Webster added.

The 90 decibel limit means persons can work and stay there for eight hours without suffering any discomfort.

Other protective measures will include: Floating roofs on tanks containing volatile products, so there

will be no release of hydro-carbons into the air as tanks are filled or emptied.

Catalytic methods of treating potentially odorous substances to render them unobjectionable instead of the old system of extraction and burning.

"Cyclones" for removing up to 99 per cent of dust which would otherwise be emitted into the atmosphere.

Closed equipment in which contents of tanks will be measured electrically, rather than with gauges through open hatches.

And an emphasis on "good housekeeping".

Mr. Webster could see advantages and disadvantages to the company being located near Hydro's new generating station and Stelco's proposed steelmaking plant.

One advantage will be that all the industries are together while the disadvantage to this is that they will all have to share the air.
