

Winter bleakness (staff photo)

Who
wants
to know?

Your local newspaper leads the way in providing local citizens with a voice in your community.

The majority of school, city and provincial officials recognize the need for keeping the public informed. An informed citizen is an educated citizen.

What's going on at your city council meeting? Local citizens want to know, and local newspapers report it . . . honestly and fully.

Local newspapers deliver, where other news sources leave off. People believe strongly in newspapers for several reasons: newspaper reading is a habit with most people; it's part of

habitual routine of daily life; and over eight out of ten adults read a newspaper every day — seven out of ten teenagers too! No other news media can match local newspapers for speedy, thorough saturation of your town.

Who wants to know? You do! And, your local newspaper is the place to find it — with a full report.

Celebrates 75th Birthday

The Canadian Tuberculosis and Respiratory Disease Association, the Christmas Seal Organization will mark its 75th anniversary in 1975.

While initially concerned only with tuberculosis, which was one of the greatest killers throughout recorded history, the Voluntary Health Association's program has expanded to include other respiratory diseases, chiefly chronic bronchitis, asthma and emphysema, and the environmental threats to the lung, air pollution and smoking.

This change in programming occurred in 1960 when the program of the Canadian Tuberculosis Association, as it was then called, enlarged to include the whole field of respiratory illnesses. At that time a medical section consisting of a group of physicians especially interested in the field of chest medicine was founded. The Canadian Thoracic Society, the medical arm of CTRDA, now has branches in seven provinces and is dedicated to the promotion of education and research, and the dissemination of scientific information concerning all aspects of thoracic disease.

Tuberculosis however, is still a force to be reckoned with in Canada. In 1972, 453 Canadians died of tuberculosis. Last year 3,563 new cases of tuberculosis were reported and 567 reactivated cases, 6,566 Canadians were under treatment as of December 31, 1973 most of those, 7,112 on an out-patient basis.

However, these figures are a far cry from the horrendous tuberculosis statistics at the turn of the century. At that time "consumption" was the number one killer in Canada. It was estimated that 200 of every 100,000 people died annually of the "white plague."

Robert Koch discovered the tubercle bacillus in 1882 which proved that

tuberculosis was a communicable disease, but it wasn't until 1943 that Professor S.A. Waksman discovered the drug streptomycin to directly attack the organism.

In 1900 the Governor General of Canada, the Earl of Minto with the support of the Canadian Medical Association established the Prevention of Consumption and other forms of Tuberculosis.

The landmarks are well known; local and provincial organizations were founded to raise funds to construct the needed sanatoria and clinics; educational programs were established to inform the public of proper treatment, of new developments, of the necessity of early diagnosis through x-rays, and of rehabilitation programs, all carried out by thousands of volunteers.

Christmas Seals were sold for the first time in Canada in 1908 in Hamilton and Toronto. By 1927 it became the official means for all branches of the Canadian Tuberculosis Association to obtain money to fight tuberculosis.

Today to a larger extent, tuberculosis is controlled in Canada. However, until complete eradication has been attained CTRDA will continue to concentrate a large part of its efforts on the control of tuberculosis.

Now, the emphasis is on other respiratory diseases. CTRDA's message is about breathing and its purpose is to combat both disease and environmental threats to the lung with its goal the prevention and control of lung disease.

Within the past twenty years there has been a fourfold increase in deaths from emphysema in this country. Eleven thousand and sixty-eight Canadians died of respiratory disease in 1972. Diseases like bronchitis, emphysema, influenza, asthma, pneumonia, tuberculosis and others. Over a third of a million respiratory disease cases were treated in Canadian hospitals in 1971

accounting for close to three and a third million patient days.

Volunteers are now engaged in health education programs dealing with anti-smoking, exercise classes for asthmatics, emphysema clubs, surveys on air pollution and the incidence of chronic respiratory disease. Professional training is now more involved in seminars for doctors and nurses on the diagnosis and treatment of chronic respiratory conditions. Health education materials are being produced on film, through audiovisual aids and literature to tell the lung story.

The Norfolk-Haldimand TB and RD Association is the local (provincial) affiliate of the Canadian Tuberculosis and Respiratory Disease Association.

The field of lung diseases is full of challenges and CTRDA has accepted them as it marches to its 75th birthday, just as it accepted the challenge of tuberculosis in 1900.

Use Mulch To Prevent Winter-Kill

Spring temperatures, freezing one day, mild the next, are as hard on plants as they are on people. Temperature fluctuations in the soil cause most winter injuries," says Ontario Ministry of Agriculture and Food horticulturist, J.H. Hughes. "However, you can minimize the damage by applying mulches late this fall."

Spread mulch after two or three frosts have firmed up your garden, using one of the wide variety of mulching materials available from your local garden centre, or an organic material such as composted straw, grass clippings or bark. A depth of three to four inches gives an adequate degree of insulation for most plants.

BRUSH - IN PROGRAM

Recent surveys show that dental conditions are improving in this area, due perhaps to the extended dental "Brush - in" detail. Records also show that a greater percentage of children are taking an active part in this brush - in activity, which is held each year.

Last year, about 90% of the eligible children took part compared to 84% the year before. This brush - in program is presently being carried out throughout this area in co-operation with the Haldimand-Norfolk Regional Health Unit.

Nanticoke Personals And Social Notes

By Mrs. Harry Evans

Mr. and Mrs. Creaser and Dana spent the New Year with Mr. and Mrs. Sam Twiddy, at Madoc, Ontario. On their return they visited Mr. and Mrs. Phil Reeves and Miss Frances Evans in Toronto and Mr. and Mrs. John Wall in Port Credit.

Guests on New Year's Day at the home of Mr. and Mrs. Jim Pond were Mr. and Mrs. Cameron Thomson, Dennis and Marie; Mr. and Mrs. Cecil Hedges and Mr. and Mrs. Russell Thomson and family.

Mr. and Mrs. Gavin of Windsor spent a few days during the holidays with the latter's daughter and family, Mr. and Mrs. Ken Kristensen.

Mr. and Mrs. Jim Lindsay spent New Year's Day with Mr. and Mrs. Paul Bartlett of Jarvis.

Holiday callers at the home of Miss Stella Pratten were Mr. and Mrs. Bill Langdown of Cambridge, Ont., and Mrs. Betty Barons

and Miss Ann Barons of London.

Selkirk Scene

The Selkirk Firemen were called out Thursday evening, to a cottage, where a fire had erupted from an overheated pump motor. The pump house was destroyed, but I understand the damage to the cottage was minor.

The Selkirk Kinsmen are planning an Auction Sale for later this month. Watch for the time and place in this paper.

Mrs. Wilfred Place is still in Norfolk General Hospital but is slowly improving.

Members are (front) Gordon Booker, president, Fred Topp, past-president, (back) Ken Best, secretary-treasurer, Glen McCombs, first vice-president, Max Ricker, second vice-president. (staff photo)

Local Heritage Group Plans Tours Of London

For the last three years a group of young people from this area have spent the winter-break vacation seeing the historical and cultural sights of London, England.

This winter will be no exception as the Rev. C.F. Waite, R.R. 5, Simcoe, plans to take 30 young folk to visit some of the famous as well as the little known spots in the greatest city of the British Commonwealth London, such as the Tower, St. Paul's Cathedral, Buckingham Palace, the British Museum, Pettoic Lane, Westminster Abbey, Hyde Park Speaker's corner, Piccadilly Circus, the Houses of Parliament and the Olde Curiosity Shoppe. In addition to these colourful places, the young people will also visit

Blenheim Palace, the birthplace of Winston Churchill and Stratford where the bones of William Shakespeare rest. The tour is conducted on a non-profit basis by the Heritage of Canada Society which has a local branch in Port Dover.

Parents will be interested

Soil And Crop Assoc. Elects Executive
